Inspection Memo
To Coal File:

RE: Convulsion Canyon Mine
Southern Utah Fuel Company
ACT/041/002, Folder # 7
Sevier County, Utah

A partial inspection of the above mentioned mine operation was conducted by Sandy Pruitt and Mike Davis, Sufco on October 11, 1983. No compliance problems were detected. Installation of the new leach field was completed, except the site still needed to be graded and seeded. The old leach field will be allowed to dry and then seeded. Right along the leach field access road the spring collection pipes for culinary water were being excavated for inspection. Topsoil is being saved in windrows and should be backfilled and seeded before winter.
