Dear Mr. Braxton:

Southern Utah Fuel Company has requested that Utah Power and Light Company up grade the electrical power line to their Convulsion Mine. The power line is under special use permit to UP&L from the Fishlake National Forest and is not associated with SUFCo's operation until it reaches the substation. The powerline provides power to SUFCo but it was not constructed for their sole use. There are private land owners with recreation residences and other potential coal mines which requested electrical power be made available. This line will serve their needs along with whatever SUFCo needs. The Fishlake National Forest welcomes any input your agency may have as an interested party. However, final approval of design and construction is made by the Forest Service as administrators of the special use permit to UP&L.

A letter from your agency to Kerry Frame of SUFCo dated June 12, 1985 gave direction and requirements for design and construction of this line. It also stated approval of the project would come from DDGM.

We are currently working with UP&L on this activity for completion to Forest Service standards. Your cooperation and understanding is appreciated.

Sincerely,

J. Kent Taylor
