Dear Mr. Frame:

Re: Substation Modification, Convulsion Canyon Mine, ACT/041/002,
Folder No. 3, Sevier County, Utah

The Division has received your letter regarding plans for an upgraded substation to facilitate longwall mining in the Convulsion Canyon Mine. It appears at this time without benefit of detailed designs that this modification would be handled as an amendment to SUFCO's mine plan which is currently undergoing final review. This minor change should not affect Final Approval of the overall plan.

Please submit the engineering design of the Substation as a modification to the current mine plan, so that it may be inserted or substituted for other material, as appropriate. New pages or maps should be numbered to fit into the text and dated. Also, please note that if the use of a longwall miner will require a change in the underground mine maps, replacement maps must be submitted.

Please contact myself or Susan C. Linner if you have any questions.

Sincerely,

D. Wayne Hedberg
Permit Supervisor/
Reclamation Hydrologist
