RE: ANNUAL REPORT FOR 1986 - SUFCO MINE

Dear Mr. Braxton:

The attached annual reports are submitted in compliance with the requirements of UMC 784. These reports include all pertinent data obtained during 1986 except as noted below.

The collection of precipitation data at the minesite began on June 23, 1986, therefore, only a partial year's listing is attached. There were no Vegetation Data collected or Revegetation Success Monitoring accomplished during 1986.

Compilation of subsidence monitoring data has been delayed by the failure of Intermountain Aerial Surveys to deliver the data as scheduled. These data will be submitted as soon as they become available. The only unresolved permit stipulation concerns a raptor survey of the cliffs on the North Fork of Quitchapah Canyon. Preparations are being made for a helicopter survey of this area in May.

Please call if you have questions.

Sincerely yours,

*Vernal J. Mortensen*
