Denver, CO 80202-2413

Dear Mr. Thompson:

In accordance with Part II-A-2 of our NPDES Permit UT0022918 and UMC 817.52 (b)(1)(ii), we are notifying you of a noncompliance sample for our NPDES Discharge Point 003.

The sample taken 15 September 1987 had a TDS level of 674 mg/l which is 24 mg/l above our permit level of 650 mg/l. A copy of the laboratory analysis is enclosed. This sample was taken as part of our regular NPDES monitoring.

This concentration is believed to be associated with natural conditions. Because the observed TDS concentrations have been so close to our permit level, we have applied for an increase in this level and the new permit effective 01 November 1987 allows a maximum allowable TDS concentration of 800 mg/l. We plan to take no action at this time.

Sincerely,
SOUTHERN UTAH FUEL COMPANY

Wesley K Sorensen
