TO: Susan Linner, Permit Supervisor
FROM: Lynn Kunzler, Reclamation Biologist *LK*
RE: Mid Permit Term Review, Southern Utah Fuel Company, Convulsion Canyon Mine, ACT/041/002, Sevier County, Utah

Summary:

An cursory review of the referenced mine plan for biological resources has been made. Technical adequacy of the plan cannot be determined at this point in time due to the several conflicting plans for the same task. The mine plan must be reorganized before a comprehensive technical review can be made.

Analysis:

Before detailed comments can be made regarding the referenced plan, the plan needs to be reorganized, with conflicting, antiquated plans being eliminated and the current plan being organized in a clear and concise manner.

Recommendations:

It is recommended that the operator submit a schedule to reorganize and reformat the mine plan. As the various reorganized chapters are submitted, a detailed review could then be performed.
