**DIVISION OF  
OIL, GAS & MINING**

Dear Dr. LaMarra:

Enclosed is a copy of the signed work order contract with your company and ours. We appreciate the opportunity for you to help us with our problem with the macro-invertebrate problem in Eccles Creek.

We have also enclosed a work order for you to do a preliminary data search of our water quality records for possible clues to solve our problem. You need to sign the work order where indicated and return it to us.

We have enclosed the following information:

1. A map showing the location of our water monitoring stations.
2. Water data 1979-1981 for CS-2, CS-3, CS-6, CS-9, CS-11, VC-6, and VC-10.
3. Water data 1981-1989 for CS-2, CS-3, CS-6, CS-9, CS-11, CS-12, CS-14, VC-6, and VC-10. This data has been put onto disk and is available at our Salt Lake City Office.
4. NPDES data for 001 for 1984 -- Feb. 1990. Some additional analyses have been made on some of these samples, particularly for the past several months. This additional data is also available in our Salt Lake City office.
5. A few miscellaneous data sheets which may be of some benefit.

Keith Welch of our Salt Lake City office has been a leader in our water quality monitoring program since the inception of the Skyline Mines. He is a valuable resource which you should contact for additional data. His Salt Lake City telephone number is 596-7111.

Keith Zobell here at the minesite will be your contact person for this project. It now appears that it is unlikely that we will receive any significant spring runoff. If you need any additional information from the minesite, please contact Keith Zobell. We are looking forward to receiving your preliminary data search report.

Sincerely,

*Glen A. Zumwalt*  
Glen A. Zumwalt  
Vice President/General Manager
