Dear Mr. Braxton:

With the expansion of Southern Utah Fuel Company's mine into the Quitchupah Lease, it is necessary to upgrade our underground electrical distribution system. As part of this upgrade, an additional 69kV substation area is needed in East Spring Canyon where our surface facilities are located. After evaluating the alternatives for such a substation area, the best location has been determined to be on the southwest end of our existing parking lot.

Enclosed are two copies of a M&RP modification package to allow construction of a substation on a new 0.27 acre pad. Please review and approve this minor modification of our M&RP. We would like to award the construction bids in early February. Therefore, we need your approval by January 15, 1991.

If you have questions concerning this modification please call me or Wess Sorensen at 637-4880.

Sincerely,  
SOUTHERN UTAH FUEL COMPANYKen Payne,  
Vice President and General Manager
