DIVISION OF
OIL GAS & MINING

Dear Mr. Haddock:

Enclosed is the response to the remaining deficiencies in the renewal application for Coastal States Energy Company's SUFCO mine. Three new pages are included along with the appropriate request form for permit change.

The deficiency relating to Plate 5-2B was corrected previously.

The deficiency relating to "type of mulch" at the Waste Rock Disposal Area is addressed on the revised page 4-4. The deficiency relating to "woody species density standard for success" at the mine portal area is addressed on revised page 3-38.

The deficiency relating to approximate original contour requirements has not been addressed. This deficiency was discussed with yourself and Paul Baker on June 24, 1993 with our representative, Wess Sorensen. Additional time is needed to formulate an appropriate response and the Division to decide on what is needed.

The deficiency relating to sample analysis of waste rock material is addressed in the new page for Appendix 6-2. This deficiency was not included in the previous deficiency documents.

Please approve these permit changes. The additional copies will be supplied to the Division after approval.

If you have questions, please contact Wess Sorensen at 637-4880.

Sincerely,
SOUTHERN UTAH FUEL COMPANY

Kenneth E. May,
General Manager
