Dear Ms. Grubaugh-Littig:

We request an inspection of the Convulsion Canyon Mine, Southern Utah Fuel Company's operation in the Mud Springs and Duncan Draw area for depleting the surface water and drying up the wet lands by undermining the area. The water is being pumped out of the mine now that used to come to the surface and make the wet lands and feed the springs.

We would like to have the mine pump the water back to the surface where it could be used for livestock watering. We don't know how they will ever replace the wet lands that have dried up.

We are available if you have any questions or need additional information.

Sincerely,

CONCERNED CITIZENS
