Re: Subsidence Pond Drainage to Box Pond

Dear Mr. DeFreest:

Canyon Fuel Company, LLC - SUFCO Mine is requesting approval to take a 580 Case backhoe up to breach the Subsidence pond that the SUFCO Mine created by subsidence in the drainage to Box Pond. To breach this subsidence pond will require digging a trench about 800' long at a maximum depth of 2.2' to reestablish the drainage (See attached map) and reseeding the disturbed area. This step will reestablish the melt and surface-water drainage to Box Pond that has been intercepted by this subsidence pond and will eliminate the impact caused by subsidence to this drainage area to Box Pond. Please approve this activity so we can complete the work this fall.

Please let me know if you need any more information or have any more questions.

Sincerely,  
 CANYON FUEL COMPANY, LLC  
 SUFCO Mine
