**Subject:** Link Canyon

Today, I received a phone call and fax from Laura Romin with the Fish and Wildlife Service about Link Canyon. She faxed a <sup>MAP</sup>map of raptor nests, and the information conflicts with what's in the SUFCO plan. Accordingly, I changed the memo Pete compiled to reflect this problem.

In addition, Laura concurred with our determination no threatened or endangered species would be adversely affected. She asked if verbal comments would suffice, and I told her it would and that I would document it in our analysis. I've done that in the memo from Pete.
