Subject: Missing 3rd Quarter samples / SUFCO Mine

Dana-

Would you please make the necessary changes in the EDI per Mike Davis's request. On the FP-1/FP-2 sites, it does say "on or near October 1" in the approved MRP, so I don't see any issue or a need for them to modify the plan. Also, in item 3, the acute toxicity testing is only required by DWQ quarterly, so the change of the monitoring frequency from monthly to quarterly, (UT00022918-003W) is the correct thing to do.

I will ask Chris to submit the necessary information for Pines 407 and 408, as per the approved water monitoring plan. That way, there will be no issue here. Allow the info was due 12/31, I think we should give them at least until 1/12 to submit Pines 407 and 408. Hope this is OK by you.
