Subject: Re: Fwd: Elk Carcass, the rest of the story!!!

I will refer you to my 2003 Sufco Subsidence report located on the O/teams/subsidence drive. Pages 77-81 document (with photos) what that subsidence crack looked like last summer. If there would have been an elk in that crack since November of 2002 I would have seen it (or smelled it). I walked it's entire length and saw no evidence of anything but fenceposts stuck in that crack.
