Subject: RE: Missing third quarter samples / water monitoring information /SUFSCO Mine

Thanks Mike for the followup. I don't think there are any problems. I will discuss what you've indicated with Dana, and ask her to make the necessary corrections to the EDI. Will keep you posted.

Pete,

1) Site 49-Pines 407 and Site 50-Pines 408 have Data-recorders and the flow logs and graph's have been sent in to the Division in the past as a spread sheet at the end of the season. We have only been putting the quarterly samples on the EDI, but Chris said that he could take a couple of representative samples off the log for July and September for the EDI this week if needed.
2) FP-1 and FP-2 are the areas that we identify the perennial portion of stream flow on or near October 1 of each year and is done during the fourth quarter monitoring the first week in October. The EDI needs to have the sample requirement changed from the 3rd quarter to the 4th quarter to solve this problem.
3) UT00022918-003W is the toxicity testing for the UT00022918-003A site. Copies of the DMR's were sent to the Division each month with the WET Data included with the Chemical data on the DMR's. The Chemical data was entered into the EDI but the WET data was overlooked on the EDI and will be entered today. The EDI needs to have the required frequency changed from monthly to Quarterly since this is only required quarterly with alternating species each quarter between Ceriodaphnia and Primephales Promelas (Fathead Minnow).

Thanks, Mike

Mike.....

SL has reported to me that the following samples are missing from your third quarter information;

1) Site 49, PINES 407, and site 50, PINES 408 are missing samples for July and September (both sites)
2) FP-1 and FP-2 have quarterly samples missing.
3) UT0022918-003W is missing samples from July, August and September (Isn't this the Quitcupah portals mine water discharge ??).

Please follow up on this missing information and let me know what is happening.....thank you.

P.S. 3rd quarter was due 12/31, so this should have a somewhat high priority.....what doesn't, right ???
