*c/04/0005*

Dear Mr. Studenka:

Enclosed are the March 2005, Discharge Monitoring Reports (DMR's) for the SUFCO Mine facility, permit number UT-0022918. Discharge point 001A had no outflow during the month. The outflow from point 002A had no exceedances for the month.

The outflow from point 003A had a TSS exceedance for the month. The daily maximum limit for TSS of 70 mg/L was not exceeded because the sample taken on March 1, 2005 had a TSS value of 53 mg/L. This TSS value will cause the seven-day average limit of 35 mg/L to be exceeded since this was the only sample taken during that week. The outflow was 3745 gpm when the sample was taken. The reason for the high TSS value is unknown since the water comes out of a sealed settling reservoir gob area in the mine. A cave in of the old workings stirring the water up behind the seal could have caused this.

Sincerely,  
CANYON FUEL COMPANY, LLC  
SUFCO Mine

John D. Byars  
Technical Services Manager

Encl.: March 2005 DMR's
