RE: Legal Notice of Intent to Approve

This letter will confirm the authorization to publish the attached NOTICE in the Richfield Reaper on April 12, 2006.

Please mail the invoice and affidavit of publication to the Utah State Department of Environmental Quality, Division of Air Quality, P.O. Box 144820, Salt Lake City, Utah 84114-4820.

Sincerely,

Rena Emery
Office Technician
Utah Division of Air Quality

NOTICE

A notice of intent for the following project submitted in accordance with §R307-401-1, Utah Administrative Code (UAC), has been received for consideration by the Executive Secretary, Utah Air Quality Board:

Canyon Fuel Company, LLC: SUFCO mine, 397 South 800 West, Salina, Utah 84654

Project Location: Approximately 30 miles north east of Salina, Utah

Project Description: Production increase to 10 millions tons of coal and replacement of two crushers

The source will be located in Sevier County, near the city of Salina, Utah. Sevier County is an attainment area of the National Ambient Air Quality Standards (NAAQS) for all pollutants. There will be no violations of the NAAQS resulting from this project.

New Source Performance Standards (NSPS) 40 CFR part 60 subpart Y - Standards of Performance for Coal Preparation Plants applies to this source. Therefore, Title V of the Clean Air Act applies to this source. National Emission Standards for Hazardous Air Pollutants (NESHAP) and Maximum Available Control Technology (MACT) do not apply to this source.

The source has limitations that are established in the Intent to Approve. Visible emissions are controlled by opacity standards set in the ITA. Some of the limitations that are listed in the ITA are as follows:

10,000,000 tons of coal produced per rolling 12-month period.

All crushers - 15% opacity

All screens - 10% opacity

The proposed emissions changes (in tons per year) will be as follows: $PM_{10} = (5.08)$, $SO_2 = (4.00)$, $NO_x = 4.89$, $CO = (2.81)$, $VOC = 0.89$, $Aldehydes = (0.30)$.

The completed engineering evaluation and air quality impact analysis showed that the proposed project meets the requirements of federal air quality regulations and the State air quality rules. The Executive Secretary intends to issue an Approval Order pending a 30-day public comment period. The project proposal, estimate of the effect on local air quality and draft Approval Order are available for public inspection and comment at the Utah Division of Air Quality, 150 North 1950 West, Salt Lake City, UT 84114-4820. Written Comments received by the Division at this same address on or before May 12, 2006, will be considered in making the final decision on the approval/disapproval of the proposed approval order. Email comments will also be accepted at mmaung@utah.gov. If anyone so requests to the Executive Secretary at the Division in writing within 15 days of publication of this notice, a hearing will be held in accordance with R307-401-4, UAC.

Date of Notice: April 12, 2006
