**Date:** 7/26/2006 8:29:36 AM  
**Subject:** SUFCO, North Water Monitoring Plan

We have reviewed the plan for the north water hydrologic monitoring and are OK with it. I encourage everyone move on this rapidly to avoid data lose.

In order to minimize surface impacts

Equipment working or moving on the riparian should be supported with boards or mine roof mats (we called them landing mats)  
Some scarification should be done on areas compacted with equipment (access routes) to discourage potential illegal ATV entrance  
Equipment should be clean and in good working order.

Tom Lloyd
