Task 2552

Wayne,

This email is in lieu of a memo for the review of revisions to the SUFCO MRP consisting of the replacement of the mine's air quality and UPDES permits (Task ID #2552). With the exception of two reference pages included with the submittal, the updated/new permits do not change any of the MRP contents and should just replace the old permits. My finding is that the above-referenced revisions to the SUFCO Mine MRP should be approved. Thank you.

Steve Fluke  
Hydrogeologis/Lead - Task ID #2552
