Mark Bunnell informed me on 11/13/2006 that he was not able to complete hole B-05 on the SITLA Muddy tract and that he had one more hole to bore on the BLM .

Since he has approval for these holes in place for 2006, I asked him to modify the drilling schedule in the NOI which OGM reviews, as well as amend the necessary lease paperwork for the SITLA hole. He said that is in progress. Mark was also informed to apply for the / extend the time period for the USFS road use permits as well as other necessary paperwork through the Forest.

This was a very short conversation, so if I have missed anything relative to what Mark must have in place in order to drill these holes in 2007, please contact him at [mbunnell@archcoal.com](mailto:mbunnell@archcoal.com). Thanks.
