**Subject:** RE: East Fork Box Canyon Post-mining Video Survey

Jim,

Sufco conducted the post-mining video survey of the East Fork of Box Canyon stream channel on September 29th, 2008 as scheduled. Both Erik Petersen (hydrologist) and Patrick Colleen (Biologist) were part of the post-mining video survey.

A copy of the video tape and final hydrological, subsidence and biological summary reports documenting the pre- and post-mining conditions will be included in the Division annual report in March 2009 as required in the Monitoring and Mitigation Plan for Mining under the East Fork of Box Canyon located in Appendix 3-10 of the Sufco M&RP.

Mike

Dave,

Did this get done? Did you, or anyone from the Division, go? Do we get a copy of the video, or a report from SUFCO?

JIM

Sufco needs to conduct a post-mining video survey of the East Fork of Box Canyon stream channel over panel 3LPE and 4LPE during September 2008 as a condition of our monitoring plan.

Due too vacations, the MineExpo in Las Vegas and to have enough advance notice for everyone to schedule this video survey this month we need to schedule it on September 29th or 30th.

Let me know which day works best for each of you as soon as possible so that we can finalize the date and time this week.

Thanks,
