Subject: SUFCO Task 3464 midterm review

April,

In their mid-term review response letter, SUFCO responded adequately to my request for further identification of the fill slopes to be used as substitute topsoil during final reclamation. These slopes will be identified in the narrative provided with the overflow pond as-builts.

I have no further deficiencies and recommend approval of the mid-term review response.

This email serves as my memo to be sent to the internal file for Task 3464.

Thank you.

SUFCO Midterm Review team:

FYI - We have extended the deadline to finish our midterm review to 6/21. This was necessary to allow SUFCO to complete necessary fieldwork they will need to do to satisfy the deficiencies dealing with their reclamation plan. If you can complete your review now based on the latest response letter, then by all means do so.

Thanks everyone!
April
