Hello Leland, Chris and Tom,

I am writing to ask about the status of the North Water Spring project. At our last meeting, we discussed having SUFCO and the USFS get together to come to an agreement about how to proceed with the mitigation project that would pump water from spring M-SP89 to the North Water area via a solar pump. What is the status of the NEPA work that would need to be completed for this project and has there been a change application filed to change the point of diversion from M-SP89 to the affected area at North Water?

There is an upcoming Emery County Water user meeting on February 1st. If there is any updated information that you could provide to me so that we may put North Water on the meeting agenda, I would be grateful.

Thanks very much.

Sincerely,

April Abate
