---

Hello Chris,

This email is from the concerned resident who owns property in the Acord Lakes region. He has questions about a couple of the water rights and some other water issues in the West Lease area. The last time you and I spoke, you had indicated that you were interested in attending. You may also want to consider bringing Erik Petersen along to answer some of the questions that pertain to the hydrology studies done in the West Lease area. Could you please let me know if the date he is proposing works for you?

Also, my other question involved the status of the North Water spring mitigation plan. Has SUFCO been in talks with Darrin Olsen of the Forest Service? The last I heard was that Pam Brown assigned Darrin Olsen to this task. Is there a consensus to stick with or modify the plan to pipe water from the spring M-SP89, or are we going to have to go back to the drawing board? I would also like to hear what the stockgrowers have to say about the PINES area. Perhaps another meeting with SUFCO, USFS and the stock growers may be in order?

Look forward to hearing from you.

Best regards,  
April

Hello April,

Will the 8th of June work for you to have the meeting at Acord Lakes? We would all meet at our cabin at Acord Lakes at 10 a.m.

It would be about a 3 hr. drive from Salt Lake to Acord Lakes.

If this would work for you I will notify everyone of that date and time.

I would also ask that you notify anyone that you think should be there, that I may have missed, as I would not want to overlook anyone. I expect a very good turnout, and look forward to meeting everyone. I will be sending a list of the questions and concerns I have about the Hydro Report as well as other water related issues.

Thank You for your timely response.

Leon Christensen
