Hello Mike,

I have added the following samples to the EDI database - please note the new sequence numbers.

Mud Spring	ID#090
Broad Hollow	ID#091
GW-8 Lizonbee Spring	ID#088
GW-9 Lizonbee Spring	ID#089

I have also reactivated monitoring well US-81-3 (ID#024) for quarterly depth to water level measurements. Is this well still having development problems or is it on track for quarterly sampling?

Erik - I was wondering if it would be possible for you to email me the photos of Broad Hollow and Mud Springs that you included in your West Lease Hydrologic Evaluation report?

Please let me know if there are any problems with data entry for these new locations....thanks!

April

No big rush, I just got the 1st quarter data from the lab and it reminded me to check on it. It's not due until June 30th.

Thanks,

Mike

Hi Mike,

No they are not entered into the DB as of yet. I will get them entered. When are you planning to upload the data?

Hi April,

Did we ever get new Division water monitoring site ID numbers for the new water monitoring site add with the West Lease addition approved on Feb 01, 2011.

New water monitoring sites are GW-8, GW-9, Mud Spring and Broad Hollow Spring. If they were I need the new site numbers list for uploading to the EDI.

Thanks,

Mike
