---

Hello Mr. Petty,

My name is April Abate, the Division hydrologist assigned to the SUFCO mine. I believe we have met once before at one of the Emery County Public Lands meetings. Priscilla Burton in my office asked if I would contact you because you had concerns about some springs that you utilize for stock watering that you feel may have been impacted by mining activities. I also recall having a conversation with you about this same issue and you had offered to take us to the springs on horseback.

I have attached a map of the SUFCO permit area. I was wondering if you could tell me where exactly on the map these springs are located? I will then have a better idea of where the springs are in relation to where mining operations are or have occurred.

Feel free to contact me at 801-538-5214 and you can walk me through where exactly on this map the springs in question are located.

Best regards,

April Abate

**April A. Abate**
