Subject: Additional Time to Complete Northwater Mitigation Plan, Canyon Fuel Company, SUFCO, C/041/0002, Task #4079

Dear Mr. May:

The Division received your email request (submitted by Leland Roberts) for additional time to address deficiencies with your mitigation plans for the Northwater Springs area. The Division hereby grants your request to submit the required plans by June 27, 2012.

The Division is aware that the grazing season will probably be occurring prior to your submittal and is concerned that we may miss the opportunity to do the monitoring of the system that we have requested. In the interim we ask that you conduct biweekly monitoring of the mitigation that you are providing for the Northwater Springs area. Operation and maintenance information of the Northwater Mitigation system should be collected. The information should include pump or truck volume estimates and water volume supplied to each trough.

We look forward to discussing the mitigation plan and your response to the deficiencies. Please call me at (801) 538-5325 if you have any questions.

Sincerely,

Daron Haddock
Coal Program Manager
