Hi Vicky- I spoke with Kyle a bit on the North Water pumps. (see attached email). I think we all agree that the pumps do not need to be operational this year. Thank you!

Hi Ingrid,

My apologies, I was just heading out the door when I saw this email come in so this may be a quick response... I'll give you a call tomorrow if that's okay. Short answer is after talking with our wildlife biologists they both agree that there is no immediate need for wildlife this fall. But we want SUFCO to do whatever is needed to be okay with you guys and their commitments. Tom Lloyd and I discussed the mitigation a little yesterday. I'll give you and call and discuss that tomorrow. Thank you for all of your work!

Hi Kyle- I just spoke with Vicky Miller at Sufco again, and she is proposing to not turn the pump on for wildlife this year and leaving the spring water available for them. That makes sense to me! So, I think, if its ok with all of you, we will just turn the pumps on next year for the cattle and the wildlife will get access to the spring. We are still needing to come up with a mitigation plan so please let me know what I can do to assist with that!. thank you!
