RE: Notice of Intent to Conduct Geotechnical Drilling

Dear Daron,

Per our earlier conversation with yourself and Steve Christensen, we have attached a drawing showing the location of proposed geotechnical holes to be drilled in early April. A photograph of the truck mounted drill rig which will drill the holes is also attached.

Holes B-1 through B-4 are within the mines DOGM disturbed area boundary, Holes B-5 through B-10 on forest service special use permit and B-11 is within the county road right-of-way/forest service special use permit.

During the drilling of these holes within the the disturbed area boundary, we commit to remove vegetation only if it will interfere with the completion of a hole when moving the hole to another adjacent location is not possible. We commit to dig/drill the hole and fill the hole once logging is completed but will attempt to complete the process within 24 hours. The holes will be refilled with a bentonite plug at the bottom and native soils at the top. The geotechnical drilling process is anticipated to take two weeks.

Sincerely,  
CANYON FUEL COMPANY, LLC  
SUFSCO Mine

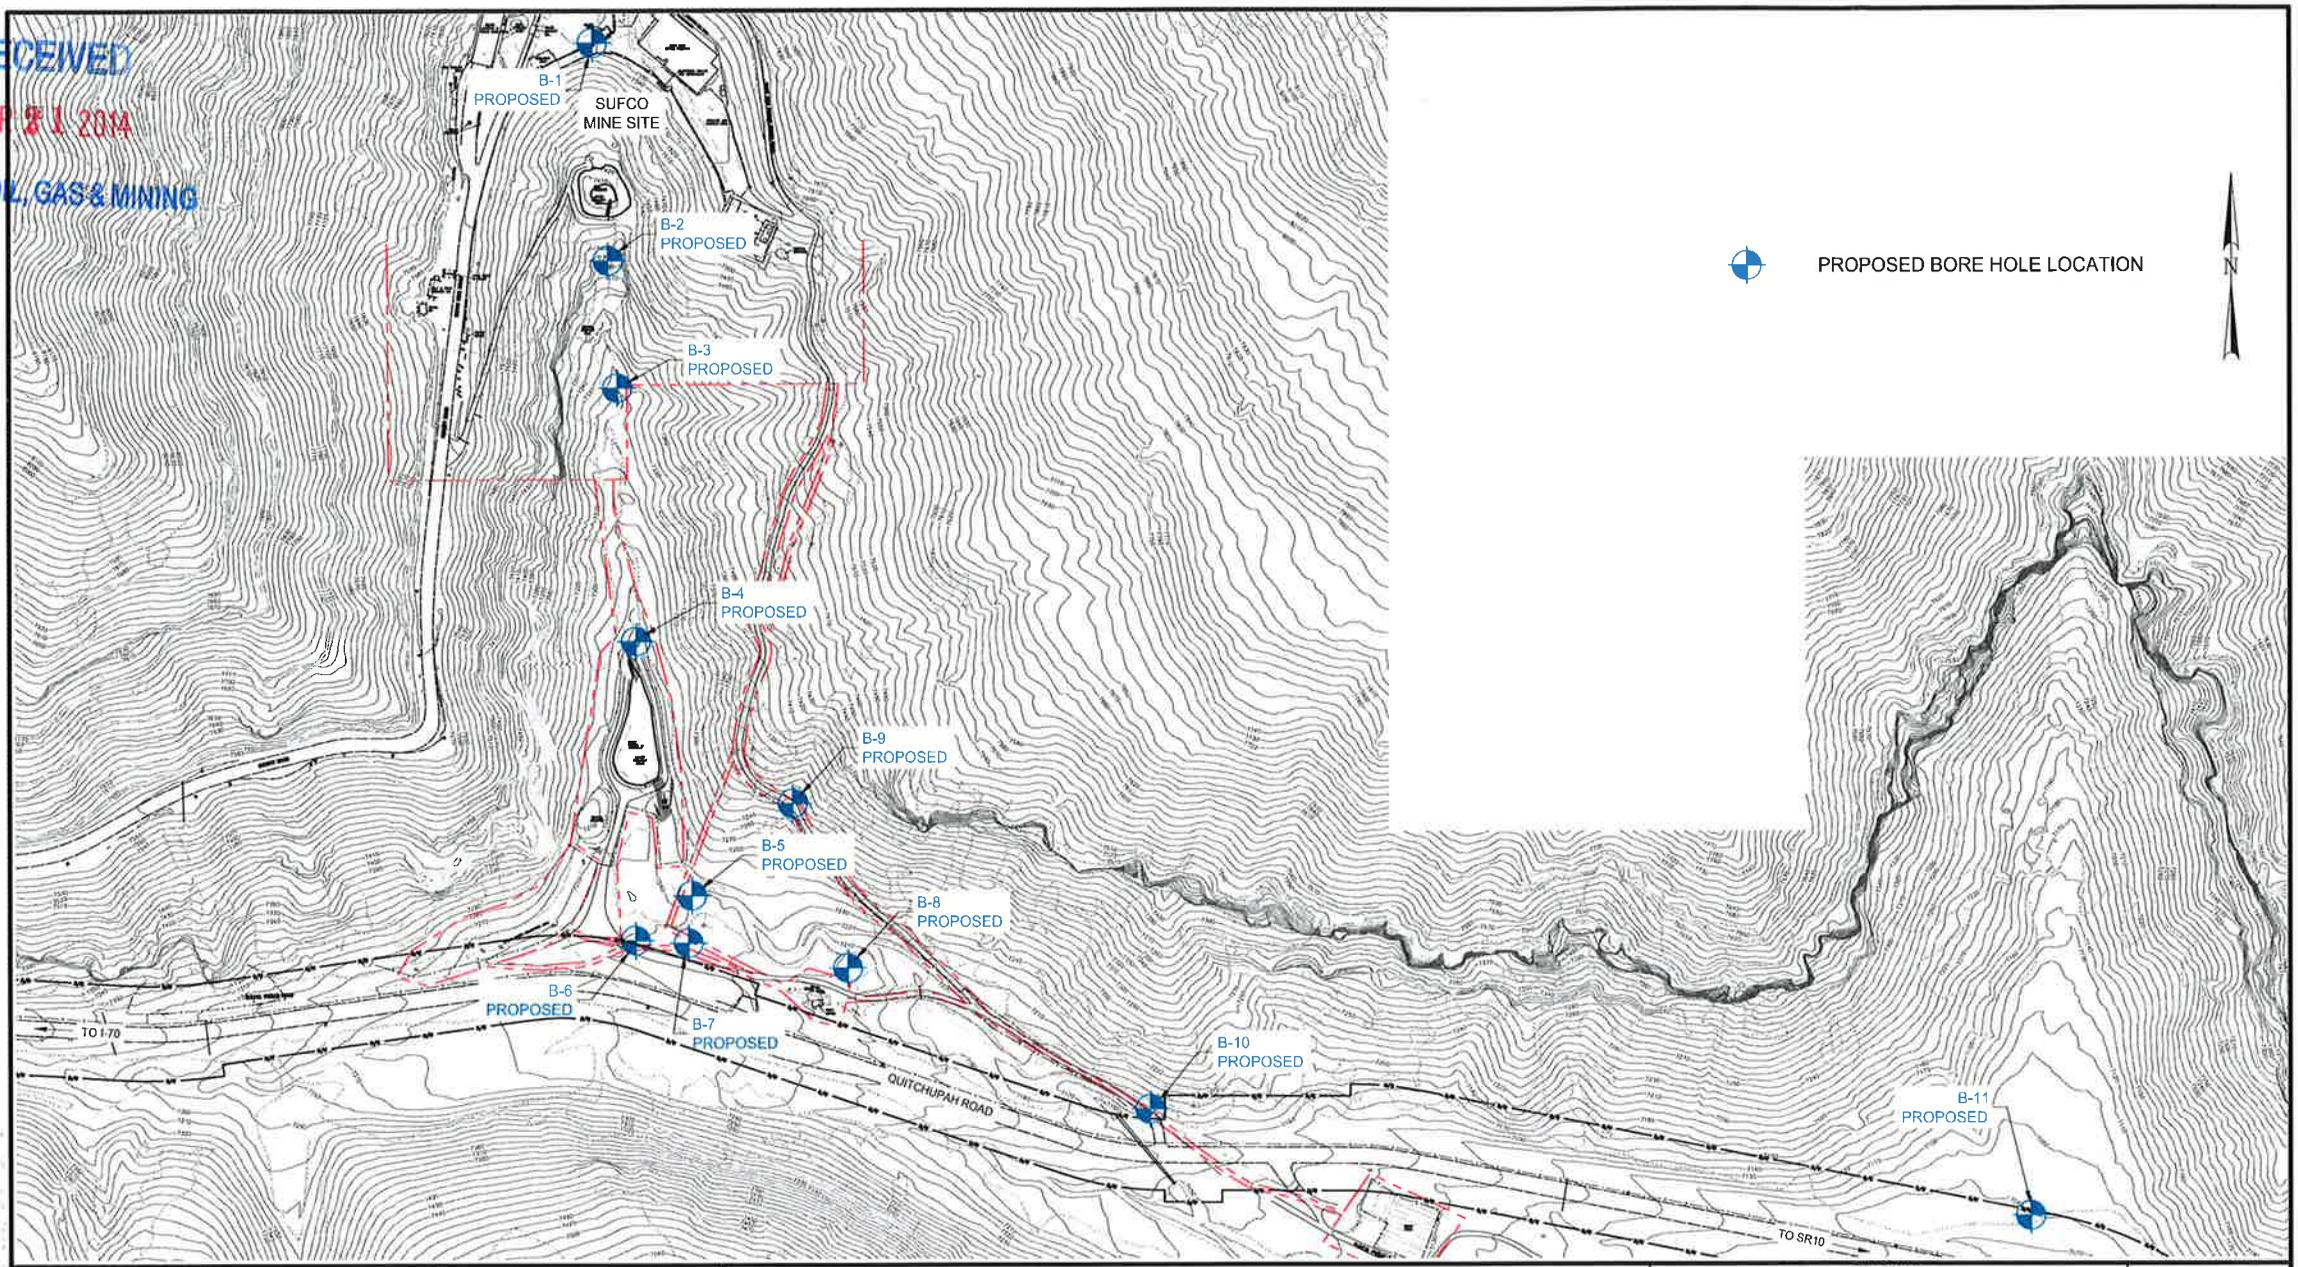

Vicky S. Miller  
Environmental Engineer
