Subject: 3R2S Panel

To: "Steve Christensen (stevechristensen@utah.gov)" <stevechristensen@utah.gov>

Disclaimer: currently personnel who can make a final confirmation of this information are out of the office today, so I am giving you the best information I can with the people available.

Mining in the area adjacent to the eastern most shelter (42SV3550) is planned for October/November 2014.

Recommended safe working conditions would preclude access to the area a month before and two months post mining.
