## Technical Analysis and Findings Utah Coal Regulatory Program

**PID:** C0410002  
**TaskID:** 4713  
**Mine Name:** SUFCO MINE  
**Title:** REVISION ASSOCIATED WITH SHELTERS

### Environmental Resource Information

#### Historic and Archeological Resource Information

##### *Analysis:*

On November 4, 2014 the Division received the additional information (maps and revised text) that describes the background of the determinations of effects (2) provided by the Forest Service archaeologist (Charmane Thompson). The maps utilized in making these determinations show that initially longwall mining would take place north of panel 3r, 2s. The current maps indicate that no mining will take place north of 3r, 2s as a means of avoiding impacts to two eligible sites (Rock Shelters). The information in the application is adequate to meet the requirements of this section of the regulations and the application is recommended for approval. As a side note the applicant should ensure that the current mining sequence is consistent with the approved Resource Recovery and Protection Plan (R2 P2).
