Mark,

Amanda and I have looked at the proposed monitoring well design and it looks good to us. Thanks for sending it to.

Regards,
Steve

Amanda and Steve:

Attached is a drawing showing my proposed shallow water monitor design that I think we should be able to install with the small heli-portable drill rigs we utilize in the roadless area within the Green's Hollow LBA. If you get a chance I would appreciate any suggestions you might have. I will be including this design in my Minor Coal Exploration permit application that is nearing completion and submittal to the Division for some SITLA coal just east of the Green's Hollow LBA. It will also be used in my Exploration License application to the BLM on the federal coal within the LBA.

Thanks,

Mark
