Re: Revisions to SITLA Lease Modification and BLM Right-of-Way Addition Amendment,
Task ID#4973, Sufco Mine, Canyon Fuel Company, LLC, Permit Number C/041/0002

Dear Sirs:

Please find enclosed with this letter a copy of the amendment related to the addition of a BLM Right-of-Way and the modification of an existing SITLA lease to incorporate the acreage into the permit boundary. The addition of the ROW and modification of the lease has required revisions to plates in the existing permit to incorporate the acreage into the boundary. In some cases addition information was gathered and placed on the plates. Chapter 4 has been updated with this submittal to include text revisions, revisions to a plate and the addition of information to Appendices 4-2 and 4-6.

Baseline information for the expanded areas were provided in the permit previously as part of the SITLA Muddy Tract or are part of the Greens Hollow SEIS information gathered by Cirrus. Right-of-Entry information has been provided in Appendix 1-1.

Information within the submittal either highlighted or underlined in blue is provided to demonstrate locations where information already exists in the approved permit to support permitting regulations.

If you have questions or need addition information please contact Vicky Miller at (435)286-4481.

APPLICATION FOR COAL PERMIT PROCESSING

Permit Change New Permit Renewal Exploration Bond Release Transfer

Permittee: Canyon Fuel Company, LLC

Mine: Sufco Mine

Permit Number: C/041/0002

Title: Revision to SITLA Lease Modification and BLM Right of Way Amendment, Task ID#4973

Description, Include reason for application and timing required to implement:

Instructions: If you answer yes to any of the first eight (gray) questions, this application may require Public Notice publication.

- Yes No 1. Change in the size of the Permit Area? Acres: 489.65 Disturbed Area: _____ increase decrease.
- Yes X No 2. Is the application submitted as a result of a Division Order? DO# _____
- Yes X No 3. Does the application include operations outside a previously identified Cumulative Hydrologic Impact Area?
- Yes X No 4. Does the application include operations in hydrologic basins other than as currently approved?
- Yes X No 5. Does the application result from cancellation, reduction or increase of insurance or reclamation bond?
- Yes X No 6. Does the application require or include public notice publication?
- Yes No 7. Does the application require or include ownership, control, right-of-entry, or compliance information?
- Yes X No 8. Is proposed activity within 100 feet of a public road or cemetery or 300 feet of an occupied dwelling?
- Yes X No 9. Is the application submitted as a result of a Violation? NOV # _____
- Yes X No 10. Is the application submitted as a result of other laws or regulations or policies?
Explain: _____
- Yes X No 11. Does the application affect the surface landowner or change the post mining land use?
- Yes X No 12. Does the application require or include underground design or mine sequence and timing? (Modification of R2P2)
- Yes X No 13. Does the application require or include collection and reporting of any baseline information?
- Yes X No 14. Could the application have any effect on wildlife or vegetation outside the current disturbed area?
- Yes X No 15. Does the application require or include soil removal, storage or placement?
- Yes X No 16. Does the application require or include vegetation monitoring, removal or revegetation activities?
- Yes X No 17. Does the application require or include construction, modification, or removal of surface facilities?
- Yes X No 18. Does the application require or include water monitoring, sediment or drainage control measures?
- Yes No 19. Does the application require or include certified designs, maps or calculation?
- Yes X No 20. Does the application require or include subsidence control or monitoring?
- Yes X No 21. Have reclamation costs for bonding been provided?
- Yes X No 22. Does the application involve a perennial stream, a stream buffer zone or discharges to a stream?
- Yes X No 23. Does the application affect permits issued by other agencies or permits issued to other entities?

Please attach one (1) review copy of the application.

I hereby certify that I am a responsible official of the applicant and that the information contained in this application is true and correct to the best of my information and belief in all respects with the laws of Utah in reference to commitments, undertakings, and obligations, herein.

Detailed Schedule Of Changes to the Mining And Reclamation Plan

Permittee: Canyon Fuel Company, LLC

Mine: Sufco Mine

Permit Number: C/041/0002

Title: Revisions to SITLA Lease Modification and BLM Right of Way Amendment, Task ID#4973

Provide a detailed listing of all changes to the Mining and Reclamation Plan, which is required as a result of this proposed permit application. Individually list all maps and drawings that are added, replaced, or removed from the plan. Include changes to the table of contents, section of the plan, or other information as needed to specifically locate, identify and revise the existing Mining and Reclamation Plan. Include page, section and drawing number as part of the description.

CHAPTER 1 GENERAL CONTENTS

110 Minimum Requirements for Legal, Financial, Compliance and Related Information

111 Introduction

For information pertaining to this section(s) refer to the General Chapter 1 binder for Canyon Fuel Company, LLC prepared for the Dugout Canyon Mine, Soldier Canyon Mine, SUFCO Mine, Skyline Mines and Banning Loadout operations.

112 Identification of Interests

112.100 Business Entity

For information pertaining to this section(s) refer to the General Chapter 1 binder for Canyon Fuel Company, LLC prepared for the Dugout Canyon Mine, Soldier Canyon Mine, SUFCO Mine, Skyline Mines and Banning Loadout operations.

112.200 Applicant and Operator

For information pertaining to this section(s) refer to the General Chapter 1 binder for Canyon Fuel Company, LLC prepared for the Dugout Canyon Mine, Soldier Canyon Mine, SUFCO Mine, Skyline Mines and Banning Loadout operations.

112.300 Control Persons

For information pertaining to this section(s) refer to the General Chapter 1 binder for Canyon Fuel Company, LLC prepared for the Dugout Canyon Mine, Soldier Canyon Mine, SUFCO Mine, Skyline Mines and Banning Loadout operations.

**112.400 Coal Mining and Reclamation Operation Permit Applications
 Previous, Current or Pending**

The following list describes all permits held by Canyon Fuel Company, LLC, all pending applications for permits, and any permit recognized as necessary in the future for which no application has been filed. Identification numbers of applications or permits are contained in the following list. Many of the agencies listed, however, have review responsibility only and may not have submitted a numbered permit.

<u>Permit</u>	<u>Issuing Authority</u>	<u>Approval Status/ Identification No.</u>
Mining and Reclamation Permit C/041/002	State of Utah Department of Natural Resources Division of Oil, Gas and Mining Department of Interior U.S. Geological Survey and Office of Surface Mining Department of Agriculture U.S. Forest Service Fishlake National Forest and Manti La Sal National Forest	Approved
U.P.D.E.S. Permit UT-0022918	Environmental Protection Agency and Utah D.E.Q.	Approved
Disposal for Water Discharge	Utah Department of Health	Approved
Business License	Sevier County	Approved
Mine Health and Safety Permits 42-00089	Mine Safety and Health Administration - Utah	Approved
ID No. 1211-UT-09-00089-01	Mine Safety and Health Administration	Waste Rock Disposal Area Construction Plan
Radio Permits	Federal Communications Commission	Approved

Certificate of Insurance and Authorization to do Business in State	State Industrial Development Commission	Approved
Public Water Supply Permit #21020	State of Utah Department of Health Division of Environmental Health	Approved
Radiation Control	State of Utah Department of Environmental Quality, Division of Radiation Control	Approved
Special Use 4078-2	U.S. Forest Service Fishlake National Forest	Approved
Air Quality Approval Orders	State of Utah Utah Air Conservation Committee Department of Health Division of Environmental Health	Approved
Water Rights	State Engineer	Approved

The Canyon Fuel Company, LLC mining permits and operations are:

SUFCO Mine	C/041/002
Skyline Mine	C/007/005
Soldier Canyon Mine	C/007/018
Banning Loadout	C/007/034
Dugout Canyon	C/007/039

The issuing authority for the Canyon Fuel Company, LLC permits is the UDOGM.

Operations held by subsidiary companies of Arch Coal, Inc. and corporate structure are presented on Figure 1-1 in the General Chapter 1 for Canyon Fuel Company, LLC. Facility names, mailing addresses and permit numbers for these operations are provided in either Table 1-1 and/or Table 1-2. For additional information refer to the General Chapter 1 binder for Canyon Fuel Company, LLC prepared for the Dugout Canyon Mine, Soldier Canyon Mine, SUFCO Mine and Skyline Mines and Banning Loadout operations.

112.500 Legal or Equitable Owner of the Surface and Mineral Properties

Owner of all the surface under Federal Coal Leases U-062453, SL-062583, U-0149084, U-047080, U-063214, U-28297, UTU-76195 and State of Utah Coal Lease ML 49443-OBA is:

United States of America
Department of Agriculture
U.S. Forest Service
Fishlake National Forest
115 East 900 North
Richfield, Utah 84701

United States of America
Department of Agriculture
U.S. Forest Service
Manti-La Sal Forest
599 West Price River Drive
Price, Utah 84501

United States of America
Department of Interior
Bureau of Land Management
Price Coal Office
125 South 600 West
Price, Utah 84501

Lessee for the Federal Coal Leases and State of Utah Coal Lease is:

Canyon Fuel Company, LLC
225 North 5th Street, 9th Floor
Grand Junction, CO 81501
Telephone: (970) 263-5130

~~Lessee for the State of Utah Coal Lease is:~~

~~_____ Ark Land Company and Arch Coal Inc.
_____ Cityplace One, Suite 300
_____ St. Louis, MO 63141~~

The Bureau of Land Management owns the mineral rights for the Federal Coal Leases and the State of Utah owns the mineral rights for the State Coal Lease.

United States of America
Department of Interior
Bureau of Land Management
Price Coal Office
125 South 600 West
Price, Utah 84501

State of Utah
School and Institutional Trust Lands Administration
675 East 500 South, Suite 500
Salt Lake City, Utah 84102-2818

The Applicant owns 640 acres of coal within the lease area. Surface ownership of these acres is listed below:

Neal J. Mortensen
c/o UNELCO, Inc.
Aurora, Utah 84620

Roger E. Nielsen and Ruth Nielsen
515 East 240 North
Salina, Utah 84654

Canyon Fuel Company, LLC
225 North 5th Street, 9th Floor
Grand Junction, CO 81501
Telephone: (970) 263-5130

A property ownership map of the permit area and adjacent area is presented as Plate 5-6.

No area within the lands to be affected by surface operations and facilities or within the area of coal to be mined is under a real estate contract.

Coal mining and reclamation operations are listed on Table 1-1 and the corporate structures is presented on Figure 1-1 in the General Chapter 1 binder.

112.600 Owners of Record of Property Contiguous to Proposed Permit Area

The following list contains the names and addresses of all owners of surface lands contiguous to the permit boundary:

United States of America
Department of Agriculture
U.S. Forest Service
Fishlake National Forest
115 East 900 North
Richfield, Utah 84701

United States of America
Department of Agriculture
U.S. Forest Service
Manti-La Sal National Forest
599 West Price River Drive
Price, Utah 84501

State of Utah
School and Institutional Trust Lands Administration
675 East 500 South, Suite 500
Salt Lake City, Utah 84102-2818

United States of America
Department of Interior
Bureau of Land Management
Price Coal Office
125 South 600 West
Price, Utah 84501

The following list contains the names and addresses of the owners of mineral acreage contiguous to the permit boundary:

State of Utah
School and Institutional Trust Lands Administration
675 East 500 South, Suite 500
Salt Lake City, Utah 84102-2818

United States of America
Department of Interior
Bureau of Land Management
Price Coal Office
125 South 600 West
Price, Utah 84501

112.700 MSHA Numbers

Mine ID No. 42-00089, Waste Rock ID No. 1211-UT-09-00089-01.

112.800 Interest in Contiguous Lands

The applicant owns or controls, directly or indirectly, no legal or equitable interest in any lands contiguous to the permit area.

112.900 Certification of Submitted Information

Canyon Fuel Company, LLC hereby attests that the information contained in this permit document is true and correct to the best of their knowledge.

113 Violation Information

For violation information refer to Table 1-2 in the General Chapter 1 binder for Canyon Fuel Company, LLC prepared for the Dugout Canyon Mine, Soldier Canyon Mine, SUFCO Mine, Skyline Mines and Banning Loadout operations.

114 Right-of-Entry Information

Copies of documents granting the legal right to enter and begin underground coal mining activities have not changed with the acquisition. They can be found in Appendix 1.1 Mining and Reclamation Plan for the SUFCO Mine, which is unmodified by this Notice of Change in Ownership and Control Information.

The right to enter the leaseholds conveyed by the Federal Coal Leases is conferred to the lessee by the Mineral Leasing Act of 1920 and the leases themselves. Copies of Federal Coal Leases U-47080, U-28297, U-62453, U-149084, U-63214, UTU-76195, UTU-91108 (ROW), SL-062583 and

State of Utah Coal Lease ML 49443-OBA which grant the right to enter and conduct underground mining operations on the leased premises are presented in Appendix 1-2 Mining and Reclamation Plan for the SUFACO Mine. Appendix 1-2 is unmodified by this Notice of Change in Ownership and Control Information.

Federal Coal Lease SL-062583 grants the right to use lands for the construction and utilization of surface facilities necessary for underground coal mining.

The legal description of the SUFACO coal leases:

Sec. 9: All

Canyon Fuel Company, LLC acquired the right to entry on these properties in the merger described in Section 111 hereinabove.

In addition, the SUFCA Mine permit area includes certain fee lands owned by Canyon Fuel Company, LLC as follows:

- T. 21 S., R. 5 E., SLB&M, Utah
Sec. 29, SW1/4, NW1/4, W1/2NE1/4, W1/2SE1/4
Sec. 30, S1/2NE1/4, E1/2SE1/4
containing 640.00 acres
- T. 22 S., R. 4 E., SLB&M, Utah
Sec. 18, NW1/4NE1/4
containing 40 acres

The name of the owner of these fee lands changed from Coastal States Energy Company to Canyon Fuel Company, LLC as a result of the merger transaction described in Section 111 hereinabove.

The SUFCA Mine also uses certain Forest Service lands in its operation for a spring collection system, pumphouse, water transmission line, sanitary discharge line, sanitary drainfield, access road to the sediment pond, and 25 KV powerline. These USFS special use permit areas are shown on Plate 5-6 through portions of:

- T. 22 S., R. 4 E., SLB&M, Utah
Sec. 12, S1/2
containing 15.32 acres

The name of the permittee changed from Southern Utah Fuel Company to Canyon Fuel Company, LLC pursuant to the merger described in Section 111 herein above.

The total lease area includes 20,991.07 acres of Federal coal leases, 70 acres of BLM R-O-W, ~~2,134.19~~ 2,553.84 acres of State of Utah coal leases, 640 acres of fee coal leases, the 40 acres waste rock disposal site and 15.32 acres under U.S. Forest Service special use permit for a total of ~~23,820.58~~ 24,310.23 acres.

115 Status of Unsuitability Claims

To the best knowledge of Canyon Fuel Company, LLC, no portion of the area to be permitted is designated, or under study for being designated, unsuitable for mining.

Since the SUFACO Mine was in production before passage of the Surface Mining Control and Reclamation Act of 1977, the unsuitability criteria were not applied to the existing surface facilities.

Canyon Fuel Company, LLC does not propose to conduct coal mining or reclamation operations within 300 feet of any occupied dwelling. Coal mining and reclamation operations have been or will be conducted within 100 feet of a public road, see Section 5.2.1.1 for details. Forest Service approval to conduct coal mining and reclamation operations within 100 feet of the Link Canyon forest service road is located in Appendix 1-1 and the newspaper advertisement for public comment is located in Appendix 1-3.

116 Permit Term

The following information is presented to identify permit term requirements and stipulations. Canyon Fuel Company will be operating the SUFACO Mine with continuous miner and longwall mining methods. Although the Mining and Reclamation Permit Application covers the next five-year period of mining, information is presented below for the life of the mining operation:

1.	First coal produced	1941
2.	Termination of mining activity	August, 2025
3.	Horizontal extent of mine workings	23,820.58 acres
		(Life of mine)
4.	Vertical extent of mine workings	Surface to 2,000 feet deep
		(Life of mine)

The anticipated total acreage to be affected during the five years of operation by underground mining activities is 1,500 acres. The estimated number of total surface acres to be affected over the entire mining operation is 48.432 acres.

<u>PERMITTED DISTURBED AREA BOUNDARY</u>	<u>ACTUAL AREA CURRENTLY DISTURBED TO BE RECLAIMED</u>	<u>SITE DESCRIPTION</u>
30.210	17.405	Mine Site, East Spring Canyon

The legal description of the SUFCO permit area:

Mine Site Facility, Water Tank, South Portals, Spring Collection Field, Pump House, Pipeline, Leachfield (Approximately 64.403 acres)

T. 22 S., R. 4 E., SLBM, Utah

Section 12: A Portion of the following:
 E1/2NW1/4, SW1/4NW1/4NE1/4, S1/2

Portals - 3 East, 4 East, Quitcupah and Link Canyon, Link Canyon Substation No. 1 and No. 2 (Approximately 3.368 acres)

T. 21 S., R. 5 E., SLBM, Utah

Section 26: A Portion of the following:
 SE1/4SW1/4SW1/4NW1/4, E1/2NW1/4NW1/4SW1/4
 SE1/4NE1/4SW1/4SW1/4

Section 29: A Portion of the following:
 NW1/4NW1/4SW1/4SE1/4, NE1/4NW1/4SE1/4SW1/4,
 NE1/4NE1/4SE1/4SW1/4

Section 32: A Portion of the following:
 NE1/4SW1/4SW1/4NE1/4

Waste Rock Disposal Site (Approximately 41.812 acres)

T. 22 S., R. 4 E., SLBM, Utah

Section 18: NW1/4NE1/4

North Water Mitigation Area (Approximately 542.260 acres)

T. 21 S., R. 5 E., SLBM, Utah

Section 2: A Portion of the following:
SW1/4SW1/4SW1/4

Section 3: A Portion of the following:
S1/2SE1/4

Section 10: A Portion of the following:
NE1/4, N1/2NE1/4SE1/4

Section 11: A Portion of the following:
W1/2NW1/4, W1/2SE1/4NW1/4, E1/2SW1/4, NW1/4SW1/4, S1/2SE1/4,
E1/2SW1/4SW1/4, NW1/4SE1/4, S1/2NE1/4SE1/4

Section 12: A Portion of the following:
W1/2SW1/4

Section 14: A Portion of the following:
W1/2NE1/4, NE1/4NW1/4

Quitcupah Fan and Shaft Site (Approximately 68.640 acres)

T. 21 S., R. 5 E., SLBM, Utah

Section 18: A Portion of the following:
S1/2

Section 19: A Portion of the following:
NW1/4NE1/4NE1/4

The permit area boundary, which is shown on Plate 5-6, includes portions of Federal coal leases, fee coal leases, the waste rock disposal site and U.S. Forest Service special use permit areas for a total of 720.483 acres.

117 Insurance and Proof of Publication

Certificates of Insurance issued to Canyon Fuel Company, LLC are located in the General Chapter 1 binder prepared for the Dugout Canyon Mine, Soldier Canyon Mine, SUFCA Mine, Skyline Mines and Banning Loadout operations and in Appendix 8-1.

The newspaper advertisement appears in Appendix 1-3. Verification of the advertisement appearing in the appropriate newspapers will be added to Appendix 1-3 and submitted to the Division no later than 4 weeks after publication.

118 Filing Fee

A photocopy of the receipt is presented in Appendix 1-4 as proof of payment of the permit filing fee.

120 Permit Application Format and Contents

The permit application contains clear, concise, current information, in the format required by the UDOGM.

130 Reporting of Technical Data

All technical data submitted in the permit application is accompanied by the names of persons or organizations that collected and analyzed the data. The technical data also contains the dates of collection and analysis of the data, and descriptions of the method used to collect and analyze data. A professional qualified in the subject, planned or directed the technical analyses.

140 Maps and Plans

The maps submitted in this permit application correspond to the format required by the regulations.

Those portions in the mine plan area in which underground coal mining activities occurred before August 3, 1997, and from August 3, 1977 to May 3, 1978 are presented on Plate 5-1.

150 Completeness

The Applicant believes the information in this permit application to be complete and correct.

APPENDIX 1-1

Legal Right-of-Entry Documents

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT
RIGHT-OF-WAY GRANT/TEMPORARY USE PERMIT

Issuing Office
Utah State Office

Serial Number
UTU-91108

1. A (right-of-way) (permit) is hereby granted pursuant to:

- a. Title V of the Federal Land Policy and Management Act of October 21, 1976 (90 Stat. 2776; 43 U.S.C. 1761);
- b. Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185);
- c. Other (describe) _____

2. Nature of Interest:

- a. By this instrument, the holder Canyon Fuel Company, LLC receives a right to construct, operate, maintain, and terminate a an underground access Right-of-Way through Federal Mineral Estate on public lands (or Federal land for MLA Rights-of-Way) described as follows.

Salt Lake Meridian, Utah
T. 21 S., R. 4 E.

Sec. 1, E $\frac{1}{2}$ SE $\frac{1}{4}$, SE $\frac{1}{2}$ NE $\frac{1}{4}$ SE $\frac{1}{4}$;
Sec. 12, E $\frac{1}{2}$ E $\frac{1}{2}$ NE $\frac{1}{4}$.

- b. The right-of-way or permit area granted herein is 660 feet wide, 4,620 feet long and contains 70 acres, more or less. If a site type facility, the facility contains N/A acres.
- c. This instrument shall terminate on December 31, 2045, 30 years from its effective date unless, prior thereto, it is relinquished, abandoned, terminated, or modified pursuant to the terms and conditions of this instrument or of any applicable Federal law or regulation.
- d. This instrument may may not be renewed. If renewed, the right-of-way or permit shall be subject to the regulations existing at the time of renewal and any other terms and conditions that the authorized officer deems necessary to protect the public interest.
- e. Notwithstanding the expiration of this instrument or any renewal thereof, early relinquishment, abandonment, or termination, the provisions of this instrument, to the extent applicable, shall continue in effect and shall be binding on the holder, its successors, or assigns, until they have fully satisfied the obligations and/or liabilities accruing herein before or on account of the expiration, or prior termination, of the grant.

3 Rental

For and in consideration of the rights granted, the holder agrees to pay the Bureau of Land Management fair market value rental as determined by the authorized officer unless specifically exempted from such payment by regulation. Provided, however, that the rental may be adjusted by the authorized officer, whenever necessary, to reflect changes in the fair market rental value as determined by the application of sound business management principles, and so far as practicable and feasible, in accordance with comparable commercial practices.

4 Terms and Conditions:

- a. This grant or permit is issued subject to the holder's compliance with all applicable regulations contained in Title 43 Code of Federal Regulations parts 2800 and 2880.
- b. Upon grant termination by the authorized officer, all improvements shall be removed from the public lands within 90 days, or otherwise disposed of as provided in paragraph (4)(d) or as directed by the authorized officer.
- c. Each grant issued pursuant to the authority of paragraph (1)(a) for a term of 20 years or more shall, at a minimum, be reviewed by the authorized officer at the end of the 20th year and at regular intervals thereafter not to exceed 10 years. Provided, however, that a right-of-way or permit granted herein may be reviewed at any time deemed necessary by the authorized officer.
- d. The stipulations, plans, maps, or designs set forth in Exhibit(s) Labeled "A" and "B", dated 02/17/2015, attached hereto, are incorporated into and made a part of this grant instrument as fully and effectively as if they were set forth herein in their entirety.
- e. Failure of the holder to comply with applicable law or any provision of this right-of-way grant or permit shall constitute grounds for suspension or termination thereof.
- f. The holder shall perform all operations in a good and workmanlike manner so as to ensure protection of the environment and the health and safety of the public.

IN WITNESS WHEREOF, The undersigned agrees to the terms and conditions of this right-of-way grant or permit

(Effective Date of Grant)

Plan of Development for Proposed Underground Access Right-of-Way

1. Purpose and Need for the Right-of-Way

a. What will be constructed

Approximately 4,600 feet of three access entries will be constructed, two of which will be constructed within the proposed underground right-of-way. This is the furthest extent of three access entries that are approximately 8,600 feet in total length. The described entries will serve as ventilation and escapeway routes for the miners. The two entries will include the intake and return ventilation.

b. Actual purpose and/or need for the proposal

The proposed project is needed in order to develop underground access from the existing mine area to coal reserves held by the Utah State Institutional Trust Lands Administration (SITLA). Without access, Sufco Mine will face possible shut down and the SITLA coal reserves will never be recovered.

The proposed underground right-of-way is being sought based upon the precedent set forth in the case of the State of Utah v. Andrus, Nos. C.79-0037, C-0307. The findings of the court in this case state that: "1) BLM can regulate the method and route of access to state trust lands; 2) this regulation may be done with a view toward preventing impairment of wilderness characteristics (assuming no existing use); and 3) the regulation may not, however, prevent the state or its lessee from gaining access to its land, nor may it be so prohibitively restrictive as to render the land incapable of full economic benefit".

The proposed underground right-of-way is located entirely underground and will be accessed through the active area within the Sufco Mine. The Sufco mine will serve as the access point to the SITLA reserve by utilizing the already disturbed surface at the mine site. The only alternative to access the SITLA coal reserve would be to construct new surface facilities on United States Forest Service lands. This would result in surface disturbance of approximately 100 acres.

There is no planned entry closure or surface subsidence across the entries within the proposed underground right-of-way.

The term of the underground right-of-way will be for a period of thirty (30) years.

c. Length and width of the right-of-way and the area needed for related facilities

The area for the underground right-of-way is contained within 70 acres. A legal description is provided in section "5. Right-of-way location".

d. Type of construction

All construction within the underground right-of-way will be new. It will be constructed with standard underground mining equipment and entry support. No surface access will be required for construction.

e. Is the use temporary or permanent

Access through the underground right-of-way will be temporary, however, the entries and associated support structures will remain permanently in place. Upon completion of mining of the SITLA and adjacent Federal coal, all temporary equipment, structures, etc. will be removed. Once all items are recovered, the access entries will be permanently sealed.

f. Is this ancillary to an existing right-of-way

No. This is a new underground right-of-way that will allow access across a small portion of coal reserves that is adjacent to currently leased and future planned leased SITLA reserves.

g. Type and volume of traffic anticipated

Underground traffic will be limited only to approved underground mining equipment and qualified operators. There will be no public access. The underground right-of-way will be used daily 24 hours per day.

h. Origination and destination

The underground right-of-way will originate at the boundary line of existing coal lease UTU-63214, and also the quarter section line of section 12 T.21S R.4E. The underground right-of-way will continue adjacent to the end of the SITLA owned coal reserve to the North. The underground right-of-way is comprised of seven ten acre parcels.

i. List alternative routes or locations

The only alternative to access the SITLA coal reserve would be to construct new surface facilities on United States Forest Service lands. This would result in new surface disturbance of approximately 100 acres.

2. Right-of-way Location

a. Legal description

T. 21 S., R. 4 E., SLBM

Sec. 1: E₂SE₄SE₄, SE₄NE₄SE₄

Sec. 12: E₂E₂NE₄

Acre calculation of the right-of-way by land status (federal, private, etc.)

Approximately 70 acres federally held.

b. Maps

See attached

3. Design Factors

a. Minimum and maximum engineering standards

1. Mining will occur through the use of a continuous miner by developing underground entry roads within the Upper-Hiawatha coal seam and leaving behind permanent support pillars.
2. Grade and pitch of the entries on the proposed underground right-of-way will run concurrently with the variance in the coal seam. At this location, the coal seam dips gently to the West Northwest at approximately 4 degrees.
3. There will be no surface impacts, all work will be performed underground.
4. As needed, gravel will be used from a local source to repair the floor of the entries within the proposed underground right-of-way.
5. Width of the underground right-of-way will be approximately 660 feet. The underground right-of-way will extend approximately 4,620 feet in length. Each entry is approximately 18 feet wide, dimensions of construction are illustrated on Exhibit 1.
6. There will be no fill needed in the underground right-of-way. Approximately 102,000 tons of coal will be removed to construct the entries within the proposed underground right-of-way.

b. Plans and specifications for major structures

There will be no surface structures built within or above the underground right-of-way.

c. Temporary areas needed

There will be no surface areas needed within or above the underground right-of-way.

4. Additional Components of the Right-of-way

a. Existing components on or off public land

The proposed underground right-of-way is immediately adjacent to, and required for accessing, a SITLA issued coal lease where CFC holds the right and obligation to mine coal using underground mining methods.

b. Possible future components

Not applicable

c. Sand/Gravel supplies

None required from public land.

d. Location of equipment storage areas

Any equipment required for construction and operation of the access entries within the proposed underground right-of-way will be stored at the existing mine facilities, away from the proposed underground right-of-way.

5. Government Agencies Involved

a. Are Section 404 permits needed

Section 404 does not apply to this underground right-of-way.

b. Are State or local permits needed

CFC currently holds the coal lease associated with the adjacent SITLA ML 49443-OBA coal reserve and Federal coal lease UTU-63214. CFC also holds Utah DOGM Permit ID# C0410002.

6. Construction of the Facility

a. General overview of construction

1. The majority of construction will consist of the mining of three access entries, two of which are located within the proposed underground right-of-way. The construction will remove approximately 102,000 tons of coal and install permanent support structures.
2. Ancillary facilities consist of temporary water lines, electricity cables, and ventilation routing systems.
3. Methods of construction will be the extraction of coal using continuous miners and the beltline system. The coal will then be conveyed through the existing portion of the Sufco mine, to the existing mine site coal handling facilities.

b. Workforce

There will be approximately 45 employees used for the construction of the entries within the proposed underground right-of-way.

c. Underground flagging and staking of the right-of-way.

The entries within the proposed right-of-way will be surveyed using approved underground mining survey techniques. The surveys will occur regularly to determine the proper direction and alignment. The survey will be advanced every 200 feet. Check surveys are also conducted every 2,000 feet.

d. Clearing and grading

There will be no clearing or grading.

e. Facility construction data

The continuous miner will cut and remove coal from the designated coal seam to develop the three access entries, two of which are within the proposed underground right-of-way.

f. Access to and along right-of-way during construction

Access to the underground right-of-way will be underground through the Sufco mine main portal and entries. There will be no access from the surface above the proposed underground right-of-way.

g. Contingency Planning

1. Sufco Mine
Ken May
597 South SR24
Salina, UT 84654
(435) 286-4400

2. BLM Price Field Office
Stephen Falk
125 South 600 West
Price, UT 84501
(435) 636-3600

h. Safety Requirements

The design and operation of the entries within the underground right-of-way will meet the safety requirements governed by the Mine Safety and Health Administration (MSHA).

i. Industrial waste and toxic substances

No hazardous materials will be produced or stored on or within the underground right of way. Should a hazardous material spill occur, CERCLA regulations will be adhered to.

j. Seasonal restrictions

There are no anticipated seasonal restrictions that apply to the proposed underground right-of-way.

7. Resource Values and Environmental Concerns

a. Commensurate level of anticipated impacts

1. There are no anticipated impacts in regards to existing underground corridors.

b. Anticipated conflicts with resources

1. Public health and safety – No conflicts with public health and safety are anticipated.*
2. Air, noise, geologic hazards, mineral and energy resources, paleontological resources, soils, water, and vegetation – No conflicts anticipated.*
3. Wildlife, threatened and endangered species, - No threatened or endangered species are to be disturbed.*
4. Cultural resources – No cultural resource conflicts are anticipated.*
5. Visual resources, recreation activities, wilderness – No conflicts anticipated.*
6. BLM projects – No conflicts are anticipated with BLM projects.*

*The underground right-of-way will be located approximately 1,800 feet under the surface.

8. Stabilization and Rehabilitation

a. Rehabilitation of Right-of-way

The entries within the proposed underground right-of-way will be properly sealed and abandoned in accordance with MSHA and CERCLA regulations prior to expiration of the term.

9. Operation and Maintenance

a. Minimum maintenance and maintenance schedule

The entries within the proposed underground right-of-way will be maintained as needed to support the structural integrity of the entries.

b. Placement of control, warning and directional traffic signs

Underground signage will be placed as needed and in accordance with MSHA regulations.

c. Maintenance of special needs

There are no anticipated special needs.

d. Safety

The development and operation of the entries within the proposed underground right-of-way will meet the requirements of MSHA, 30 CFR 75.

e. Industrial waste and toxic substances

See section 6i.

f. Inspection and maintenance schedule

See section 9a. and 9i.

g. Work schedules

Work on the entries within the proposed underground right-of-way can occur 24-hours a day, 7 days a week.

h. Fire Control

All precautions necessary will be taken in order to prevent any fire from occurring. Sufco mine is trained and prepared to control a fire if such were to occur within the underground right-of-way. The equipment used for construction has fire suppression systems on board. Firefighting and personal rescue equipment is stored in each mining section pursuant to MSHA regulations.

i. Inspections

As with the existing Sufco Mine, daily inspections will be made of the access entries during construction. These inspections will be performed by a qualified person. A report will be prepared to discuss the appearances of any safety condition, instability, structural weakness, or other hazardous conditions requiring maintenance or repair.

j. Contingency planning

1. Sufco Mine

**Ken May
597 South SR24
Salina, UT 84654
(435) 286-4400**

2. BLM Price Field Office

**Stephen Falk
125 South 600 West
Price, UT 84501
(435) 636-3600**

10. Termination and Restoration

a. Will the right-of-way be totally obliterated

Structural integrity of the access entries within the underground right-of-way will continue past the expiration of the term; however, access will not be available to any person or wildlife.

b. What structures will be left in place or removed

Mine support structures will be left in place, all other structures will be removed prior to abandonment of the entries within the underground right-of-way and the area will be sealed off according to MSHA approved sealing plans.

c. Stabilization of disturbed area

See above sections 10a. and b.

TERMS AND CONDITIONS

- 1) **Cultural and Paleontological Resources** – If cultural resources or paleontological remains (fossils) of significant scientific interest are discovered during operations under this underground Right-of-Way (ROW) agreement, the Operator prior to disturbance shall immediately bring them to the attention of the appropriate authorities. Paleontological remains of significant scientific interest do not include leaves, ferns or dinosaur tracks commonly encountered during underground mining operations. The cost of conducting the inventory, preparing reports, and carrying out mitigating measures shall be borne by the Operator.
- 2) **Subsidence** – Except at locations specifically approved by the Authorized Officer (AO), with concurrence of the Forest Service, underground mining operations shall be conducted in a manner so as to prevent surface subsidence that would: (1) cause the creation of hazardous conditions such as potential escarpment failure and landslides, (2) cause damage to existing surface structures, and (3) damage or alter the flow of perennial streams. The Operator shall provide specific measures for the protection of escarpments, and determine corrective measures to assure that hazardous conditions are not created.
- 3) **Underground Mining** – The coal contained within, and authorized for mining under this ROW, shall be extracted only by underground mining methods. Only the removal of coal necessary to access the SITLA lands is authorized to be removed.
- 4) **Replacement of Affected Surface Water** – The Operator, at its expense, will be responsible to replace any surface and/or developed ground water sources identified for protection, that may be lost or adversely affected by mining operations, with water from an alternate source in sufficient quantity and quality to maintain existing riparian habitat, fishery habitat, livestock and wildlife use, or other land uses (authorized by 36 CFR 251).
- 5) **Recoverable Coal** – Only coal necessary to access the SITLA lands is authorized to be removed. The BLM reserves the right to seek damages against the operator in the event the operator is determined to have removed more coal than authorized. Damages shall be assessed on the value, for the removed coal. BLM accepts that the projected mine entry dimensions and orientations are subject to standard operating practice variances for underground coal mining.

Subject to the right to appeal hereinafter set forth, payment on such mined coal shall become due and payable upon determination by the AO.

The BLM may enforce this provision either by issuing a written decision requiring payment, or by issuing a notice of non-compliance. A decision or notice of non-compliance issued by the BLM that payment is due under this stipulation is appealable as allowed by law.

- 6) **Waste Certification** – The Operator shall provide upon abandonment and/or sealing off a mined area and prior to lease termination/relinquishment, certification to the Operator that, based upon a complete search of all the operators records for the mine and upon their knowledge of past operations, there has been no **hazardous substances per (40 CFR 302.4)** or used oil as per Utah State Management Rule R-315-15, deposited within the ROW, either on the surface or underground, or that all remedial action necessary has been taken to protect human health and the environment with respect to any such substances remaining on the property. The back-up documentation to be provided shall be described by the Operator prior to the first certification and shall include all documentation applicable to the Emergency Planning and Community Right-to-know Act (EPCRA, Public Law 99-499), Title III of the Superfund Amendments and Reauthorization Act of 1986 or equivalent.
- 7) **Abandonment of Equipment** – The Operator is responsible for compliance with reporting regarding toxic and hazardous material and substances under federal law and all associated amendments and regulations for the handling of such materials on the land surface and in underground mine workings.

The lessee/operator must remove mine equipment and materials not needed for continued operations, roof support and mine safety from underground workings prior to abandonment of mine sections. Exceptions can be approved by the AO (BLM) in consultation with the surface management agency. Creation of a situation that would prevent removal of such material and by retreat or abandonment of mine sections without prior authorization would be considered a noncompliance with ROW terms and conditions and subject to appropriate penalties under the ROW.

- 8) **Underground Inspection** – All safe and accessible areas shall be inspected prior to being sealed. The Operator shall notify the AO in writing 30 days prior to the sealing of any areas in the mine and state the reason for closure. Prior to seals being put into place, the Operator shall inspect the area and document for approval any equipment/machinery, hazardous substances, or used oil that is to be left underground.

The purpose of this inspection will be: (1) to provide documentation for compliance with 42 U.S.C. 9620 section 120(h) and State Management Rule R-315-15, and to assure that certification will be meaningful at the time of ROW relinquishment, (2) to document the inspection with a mine map showing location of equipment/machinery (model, type of fluid, amount remaining, batteries etc.) that is proposed to be left underground. In addition, these items will be photographed at the Operator's expense and shall be submitted to the AO as part of the certification. The abandonment of any equipment/machinery shall be on a case by case basis and shall not be accomplished unless the AO has granted a written approval. .

9) Operation and Maintenance

a. **Minimum maintenance and maintenance schedule**

The mine entries within the proposed underground right-of-way will be maintained as needed to support the structural integrity of the entries.

b. **Placement of control, warning and directional traffic signs**

Underground signage will be placed as needed and in accordance with MSHA regulations.

c. **Maintenance of special needs**

There are no anticipated special needs.

d. **Safety**

The development and operation of the entries within the proposed underground right-of-way will meet the requirements of MSHA, 30 CFR 75.

e. **Industrial waste and toxic substances**

See Section 6i.

f. **Inspection and maintenance schedule**

See Section 9a and 9i.

g. **Work schedules**

Work on the entries within the proposed underground right-of-way can occur, 24-hours a day, 7 days a week.

h. **Fire Control**

All precautions necessary will be taken in order to prevent any fire from occurring. SUFCO mine is trained and prepared to control a fire if such were to occur within the underground right-of-way. The equipment used for construction has fire suppression systems on board. Firefighting and personal rescue equipment is stored in each mining section pursuant to MSHA regulations.

i. **Inspections**

As with the existing SUFCO Mine, daily inspections and records will be made of the access entries during construction/operation. These inspections will be performed by a qualified person. A report will be prepared to discuss the appearances of any safety condition, instability, structural weakness, or other hazardous conditions requiring maintenance or repair.

j. Contingency Planning

1. SUFCO Mine
Ken May
597 South SR24
Salina, UT 84654
(435) 286-4400

2. BLM Price Field Office
Stephen Falk
125 South 600 West
Price, UT 84501
(435) 636-3600

10) **Termination and Restoration**

- a. Will the right-of-way be totally obliterated
Structural integrity of the access entries within the underground right-of-way will continue past the expiration of the term; however, access will not be available to any person or wildlife.
- b. What structures will be left in place or removed
Mine support features will be left in place, all other structures will be removed prior to abandonment of the entries within the underground right-of-way and the area will be sealed off according to MSHA approved sealing plans.
- c. Stabilization of disturbed area
See above Sections 10a and 10b.

11) **Fair Market Value**

- a. The proponent will pay at the time the Right-of-way grant is issued an initial FMV of \$0.20 per ton of coal accessed on 102,000 tons. After the Greens Hollow Tract is leased an adjustment will be made on the FMV based on the winning bonus bid. Payment shall be in the form of a cashier's check, certified check, bank draft, or money order payable to the Bureau of Land Management, Division of Lands and Minerals, 440 West 200 South, Salt Lake City, Utah 84101.
- b. The proponent will pay an 8 percent surcharge on the coal sold as calculated and paid as if it were sold from a lease pursuant to 43 CFR 3400. Payment shall be in the form of a cashier's check, certified check, bank draft, or money order payable to the Bureau of Land Management, Division of Lands and Minerals, 440 West 200 South, Salt Lake City, Utah 84101.

CHAPTER 2

SOILS

Dr. Theron B. Hutchings, State Soil Scientist for the Soil Conservation Service, substantiated the absence of prime farmland in the Convulsion Canyon and Link Canyon areas. (Appendix 2-1).

2.2.2 Soil Survey

A Level I soil survey of the entire SUFACO Mine disturbed area, including the Link Canyon Substations No. 1 and 2, has been conducted. Soil survey data are presented in Appendix 2-2 for the majority of the permit area, Appendix 2-6 for the Link Canyon Substation areas, and are herein summarized in Sections 2.2.2.1 through 2.2.2.3. Survey data includes the following information: taxonomic classification, horizon name and depth, dry and moist color, texture (percent sand, silt, and clay), class, structure, percent rock fragments and organic matter, pH, effervescence, EC, and solubility of calcium, magnesium, and sodium (Appendices 2-2, and 2-6). A cross-reference list of map unit, soil taxonomic classification, and sample site appears in pages 17 through 19 of Appendix 2-2.

A site specific soil survey will be completed for the Overflow Pond prior to disturbance and this information will be utilized in determining topsoil salvage depth. The results of this soil survey will be included in the as-built addendum to be included in Appendix 2-2.

An Order 2 soil survey has been completed for the Link Canyon Substation No. 1 disturbed area and is included in Appendix 2-2. Additionally, an Order 1 soil survey was conducted of the substation Nos. 1 and 2 pad areas and the results are included in Appendix 2-6.

An Order 3 soil survey has been conducted for the Pines Tract and the results are included in Appendix 2-8. (Plate 2-2)

An Order 3 soil survey has been conducted for the SITLA Muddy Tract and the results are included in Appendix 2-10. (Plate 2-3) **Soils associated with the 70 Acre BLM Right of Way are part of the Order 3 soil survey located in Appendix 2-10.**

2.2.2.1 Soils Map

Plates 2-1 and 2-2 delineates the soil types present in the disturbed and adjacent areas.

CHAPTER 3

BIOLOGY

Grassland-perennial forbs
Sagebrush
Mountain brush
Conifer timber
Mixed
Barren ground
Aspen-deciduous forest

Additional plant communities are designated on Plate 3-1.

Field sampling of these plant communities was initially done in July of 1983 and the findings were documented in the INV report. A Level II riparian inventory has been conducted along portions of East Fork of Box Canyon (USDA-USFS, 1993). The plant communities and reference areas are outlined on Plate 3-1. In 1999, another vegetation (and wildlife) report (VWP) was prepared for the proposed mine expansion called the Pines Tract Project. Vegetation communities were described and shown on a map included in that document, most of which are also listed in the plant communities shown above. The vegetation types in the SITLA Muddy Tract were identified by Cirrus and reported in EIS documents for the entire BLM and SITLA Muddy Tract. The vegetation types in the SITLA Muddy Tract are illustrated on Plate 3-1. This plate will be updated in the appropriate season of 2006 to more clearly indicate types and extent of vegetation in the SITLA Muddy Tract. As of October 2005, the available Forest Service information used to create the map is essentially correct but Sufco has agreed the vegetation boundaries and descriptions can be further refined. The work to be performed in 2006 will include the evaluation of available aerial photos of the area by a qualified person who then will create an updated vegetation map of the tract. The updated version of the plate will be submitted to the Division before the end of 2006.

A description of the potential impacts of mining on vegetation is included in Section 3.3.3.3 of this permit.

3.2.1.2 Land Productivity Prior to Mining

The land productivity of the mine area was not measured in 1941 when mining began. However, Appendix 2-2 contains a consultant study (EPS, pgs. 45 - 78) compiled in 1980, which states total

LIST OF PLATES

Plate	
4-1A	Land Uses - Quitcupah Tract
4-1B	Land Uses - Pines Tract & SITLA Muddy Tract

LIST OF APPENDICES

(Appendices appear in Volume 6)

Appendix	
4-1	Utah Big Game Annual Report, 1991, Deer Herd Unit #43, Elk Herd Unit #14
4-2	Cultural and Historical Resources
4-3	Assessment of Particulate Emissions Report
4-4	Division of Air Quality Approval Order
4-5	Cultural Resource Memorandum of Agreement
4-6	Cultural Resource Documentation

The limited amount of perennial water within the analysis area reduces the potential for many species of fish to be present. However, Muddy Creek and the lower portion of Box Canyon Creek support fish populations.

There are no oil or gas leases associated with the SITLA Muddy Tract area.

Cultural and Historic Resources Information. Cultural resource information and maps identifying cultural and historical study areas are located in Appendix 4-2. An intensive cultural resource evaluation of five coal exploration well locations has been conducted on the Quitcupah Lease by Dr. Richard Hauck of AERC (see Appendix 4-2). As part of this evaluation he also made a record search at the State Historic Preservation office and the National Register of Historic Places. No sites were found that would be effected by the drilling activity. A ten percent cultural resource potential survey was completed by Les Sikle, Forest Archeologist, Manti-La Sal National Forest. A copy of his report is included in Appendix 4-2 along with the Utah State Historical Society's concurrence letter.

An intensive cultural resource evaluation of a proposed breakout, substation and power line in the Link Canyon Locality conducted by Dr. Richard Hauck of AERC is included in Appendix 4-2. No cultural or paleontological resources were observed within the proposed Link Canyon development area during the archaeological survey.

A cultural resource evaluation of the Link Canyon Mine portals area in Link Canyon was conducted by John Senulis of Senco-Phoenix. A copy of his report is included in Appendix 4-2. The conclusion of his evaluation of the portal site was that no cultural or paleontological resources are present. Many of his conclusions were based on work previously performed in the immediate portal area and surrounding areas by Dames and Moore, AERC, JBR, and the BLM.

There are no cemeteries, public parks, historic places, or areas within the boundaries of any units of the National System of Trails or the Wild and Scenic Rivers System located in areas to be affected by the SUFCA Mine(See Appendix 4-6 for a description). The Applicant agrees, however, to notify the regulatory authority and the Utah State Historical Society of previously unidentified cultural resources discovered in the course of mining operations. The Applicant also agrees to have any such cultural resources evaluated in terms of National Register of Historic Places eligibility criteria. Protection of eligible cultural resources will be in accordance with regulatory authority and Utah SHPO requirements. The Applicant will also instruct its employees that it is a violation of federal and state laws to collect individual artifacts or to otherwise disturb cultural resources.

150 Acre Incidental Boundary Change

Cultural and Historic Information. Cultural resource information and maps identifying cultural and historical study areas are located in Appendix 4-2. Dr. Richard Hauck of AERC conducted an

intensive evaluation of the 150 acre IBC. Four new sites were discovered and recorded during the evaluation. All the sites are located on or near the east rim of Box Canyon. The sites include two significant rock shelters (42SV 2492 and 42SV 2495), a significant ceramic scatter (42SV 2493), and a non-significant kill-butcherer locus (42SV 2494).

Site 42 SV 2492 - The site consists of a rock shelter. This site is considered to be a significant resource and excellent potential for National Register classification. The site is 15 meter wide with a sandstone arched roof and is susceptible to surface subsidence.

Site 42 SV 2493 - The site consists of ceramic scatter occupying an area of 20 to 30 meters on the bedrock top at the canyon rim. This site is considered to be a significant resource and has the potential for National Register classification. This site is not considered to be at-risk or susceptible to surface subsidence.

Site 42 SV 2494 - The site consists of a dispersed scatter of debris and lithic tool fragments and is situated on the bedrock on the east rim overlooking Box Canyon. This site is not considered to be a significant resource and lacks potential for National Register classification.

Site 42 SV 2495 - The site consists of a scatter of debris primarily on the north facing slope below the base of a shallow shelter under a sandstone ledge. The site is considered to be a significant resource and has limited potential for National Register classification. This site is not considered to be at-risk or susceptible to surface subsidence.

The Applicant agrees, however, to notify the regulatory authority and the Utah State Historical Society of previously unidentified cultural resources discovered in the course of mining operations. The Applicant also agrees to have any such cultural resources evaluated in terms of National Register of Historic Places eligibility criteria. Protection of eligible cultural resources will be in accordance with regulatory authority and Utah SHPO requirements. The Applicant will also instruct its employees that it is a violation of federal and state laws to collect individual artifacts or to otherwise disturb cultural resources.

Pines Tract Area

Cultural and Historic Information. Cultural resource information and maps identifying cultural and historical study areas are located in Appendix 4-2. Dr. Richard Hauck of AERC made a record search at the State Historic Preservation office, National Register of Historic Places and conducted field investigations under state project numbers UT-96-AF-0443f and UT-97-AF-0598f. AERC coordinated the research and field investigations with SHPO.

Information concerning the potential of specific sites as to being either in the subsidence zone or out of the zone or being evaluated or unevaluated is contained in the Memorandum of Agreement between Federal and State agencies.

The monitoring, treatment plans and mitigation of the cultural resource sites will be in accordance with the Memorandum of Agreement (MOA) 00-MU-11041000-017, and any amendment to it, between the USFS - Manti-La Sal, USHPO, the Advisory Council on Historic Places, UDOGM, and the SUFCA Mine located in Appendix 4-5.

Sufco intends to undermine portions of the East Fork of Box Canyon beginning in the Fall of 2003 as they extract coal from the 3LPE and 4LPE longwall panels. This change in the mining plan will change the required monitoring schedule in accordance with the Memorandum of Agreement for site 42SV2430/ML-3446 - Elusive Peacock which will be undermined under the 3LPE longwall panel. In accordance with pages 11-12 of the MOA the required monitoring schedule of this site will change from Monitor Schedule A (Sites in areas that will be mined using full-support methods) to Monitor Schedule B (Sites in areas which will be mined under and subsided) requiring the implementation of additional monitoring of the site. Monitoring results will be provided in DOGM Annual Reports. (2003, 2004, 2005, 2006, and indefinitely until movement ceases)

Historic properties documented in the Pines Tract area include 42SV2424, a sawmill, and site 42SV2391 a complex of trash scatters. Both sites are considered ineligible for the NRHP.

The Applicant agrees, however, to notify the regulatory authority and the Utah State Historical Preservation Office (SHPO) of previously unidentified cultural resources discovered in the course of mining operations. The Applicant also agrees to have any such cultural resources evaluated in terms of National Register of Historic Places eligibility criteria.

Muddy Creek Coal Tract Area

Cultural and Historic Information. Cultural resource information and maps identifying cultural and historical study areas are located in Appendix 4-2. Cirrus Ecological Solutions, LC conducted an intensive evaluation of the Muddy Tract Area. Thirty-four sites were documented during the evaluation. Refer to Confidential Appendix 4-2, "Muddy Creek Technical Report, Heritage Resources".

The three sites located in the SITLA Muddy Tract lease area are located on or near the east rim of Box Canyon. The sites include two significant lithic scatters (42SV2554 and 42SV2597), and a non-significant lithic scatter (42SV2594). None of these three sites will be undermined under the present mine plan.

The Applicant agrees, however, to notify the regulatory authority and the Utah State Historical Preservation Office (SHPO) of previously unidentified cultural resources discovered in the course of mining operations. The Applicant also agrees to have any such cultural resources evaluated in terms of National Register of Historic Places eligibility criteria.

Results from USDA Manti-La Sal National Forest, Price Ranger District, Project #ML-02-1033, Utah State Project #U-02-MM-0311f, s, b, p

Site #	Site Type	Evaluation (Cirrus Ecological Solutions, LC)	Undermined/potential for impact by mining	Date Surveyed

LS - Lithic Scatter RS- Rock Shelter C-Ceramics

* Re-recorded on IMACS form, lumped ML#s 2281 and 2282 with this

**Re-mapped, updated 2004, possibly a different site, site also part of the Trough Hollow inventory

Site 42SV2584 and 42SV2596 lie within the boundary of the SITLA lease expansion (Section 32, T 20 S, R 5 E). According to a report prepared for the Manti-La Sal Forest by Cirrus Ecological Solutions, LC, site 42SV2584 is considered significant, while 42SV2596 is considered non-significant. In the current Sufco five year mine plan no mining is planned beneath either location and they do not lie within the angle-of-draw (Plate 5-10A), therefore no impact is anticipated to either site. Should the mine plan change where the eligible site could be impacted, the permittee will coordinate with DOGM and the USFS prior to mining.

Sites 42SV2584 and 42SV2596 were reevaluated by USFS archeologist in 2015. On 11/20/15, SHPO concurred with the USFS recommendation that site 42SV2584 be determined eligible and 42SV2596 be determined not eligible. A copy of the SHPO concurrence letter is located in Appendix 4-2 (Confidential) of the M&RP.

West Coal Lease Modification Areas

Cultural and Historic Information. Cultural resource information and maps identifying cultural and historical study areas are located in Appendix 4-2 in the Confidential folder of the M&RP. EarthTouch, Inc. conducted an intensive evaluation of the West Coal Lease Modification Areas.

The results of the cultural resource inventory for the project resulted in the identification of 15 cultural resource sites, which included three previously recorded sites (42SV1301, 42SV1386 and 42SV2688), and 12 new sites (42SV3207-3215 and 42SV3246-3248). Overall, the identified cultural resource sites consist of small- to moderate-sized lithic scatters and small rock shelters/overhangs, some with associated pictographs. Of the 15 sites identified within the West Coal Lease Modification Areas, six sites are recommended eligible for the National Register of Historic Places. These sites include 42SV3209, 42SV3211, 42SV3212, 42SV3213, 42SV3247 and 42SV3248 which consist of small rock shelters and rock shelters with pictographs. Site 42SV3209 will be the only site undermined under the present mine plan. This shelter is more of a terrace overhang that extends 6 meters long, with a 1.5 meter overhang or width.

South Fork of Quitchupah Area of 2R2S Block "A" and 3R2S Block "B"

Cultural and Historic Information. Cultural resource information and maps identifying cultural and historical study areas are located in Appendix 4-2 in the Confidential folder of the M&RP. Canyon Environmental conducted an evaluation of the South Fork of Quitchupah in and adjacent to the 2R2S Block "A" panel Area.

The results of the cultural resource inventory for the project resulted in the identification of 4 cultural resource sites, which included one previously recorded site (42SV2690), and 3 new sites (42SV3462, 42SV3463 and 42S3464). Overall, the identified cultural resource sites consist of lithic scatters and a small rock shelter/overhang. Of the 4 sites identified within the South Fork of Quitchupah Area, two sites are recommended eligible for the National Register of Historic Places.

VIRGIN RIVER, UTAH

Managing Agency:

Bureau of Land Management, St. George Field Office
National Park Service, Zion National Park

Designated Reach:

March 30, 2009. The Virgin River and tributaries, including:

1. Taylor Creek from the junction of the North, Middle and South Forks of Taylor Creek west to the Zion National Park boundary.
2. The North Fork of Taylor Creek from the head of the North Fork to its junction with Taylor Creek.
3. The Middle Fork of Taylor Creek from the head of the Middle Fork on Bureau of Land Management land to its junction with Taylor Creek.
4. The South Fork of Taylor Creek from the head of the South Fork to its junction with Taylor Creek.
5. Timber Creek and its tributaries from the head of Timber Creek and the tributaries of Timber Creek to its junction with LaVerkin Creek.
6. LaVerkin Creek beginning in Section 21, Township 38 South, Range 11 West, on Bureau of Land Management land southwest through Zion National Park to the south end of Section 7, Township 40 South, Range 12 West.
7. Willis Creek from Bureau of Land Management land in Section 27, Township 38 South, Range 11 West, to its junction with LaVerkin Creek in Zion National Park.
8. Beartrap Canyon beginning on Bureau of Land Management land in Section 3, Township 39 South, Range 11 West, to its junction with LaVerkin Creek and the segment from the headwaters north of Long Point to its junction with LaVerkin Creek.
9. Hop Valley Creek beginning at the southern boundary of Section 20, Township 39 South, Range 11 West, to its junction with LaVerkin Creek.
10. Current Creek from the head of Current Creek to its junction with LaVerkin Creek.
11. Cane Creek from the head of Cane Creek to its junction with LaVerkin Creek.
12. Smith Creek from the head of Smith Creek to its junction with LaVerkin Creek.
13. North Creek (Left and Right Forks): The Left Fork from its junction with Wildcat Canyon to its junction with the Right Fork; the head of the Right Fork to its junction with the Left Fork; and North Creek from the junction of the Left and Right Forks southwest to the Zion National Park boundary.
14. Wildcat Canyon (Blue Creek) from the Zion National Park boundary to its junction with the Right Fork of North Creek.
15. Little Creek beginning at the head of Little Creek to its junction with the Left Fork of North Creek.
16. Russell Gulch from the head of Russell Gulch to its junction with the Left Fork of North Creek.
17. Grapevine Wash from the Lower Kolob Plateau to its junction with the Left Fork of North Creek.
18. Pine Spring Wash from the head of Pine Spring Wash to its junction with the Left Fork of North Creek.
19. Wolf Springs Wash from the head of Wolf Springs Wash to its junction with Pine Spring Wash.
20. Kolob Creek beginning in Section 30, Township 39 South, Range 10 West, through Bureau of Land Management land and Zion National Park land to its junction with the North Fork of the Virgin River.
21. Oak Creek beginning in Section 19, Township 39 South, Range 10 West, to its junction with Kolob Creek.
22. Goose Creek from the head of Goose Creek to its junction with the North Fork of the Virgin River.
23. Deep Creek beginning on Bureau of Land Management land at the northern boundary of Section 23, Township 39

ENGINEERING

of mining activities is discovered on or along the side of this road, SUFCO Mine will repair this damage and implement additional runoff-control measures as needed.

Subsidence from underground mining operations may affect public-access dirt roads throughout the lease and permit areas . As part of the subsidence monitoring program, these roads will be regularly inspected. If material damage occurs to these roads as a result of mine subsidence, the roads will be repaired by SUFCO Mine.

Mining Sequence and Planned Subsidence. The mine plan for the SUFCO Mine is presented in Plate 5-7 (Upper Hiawatha seam) and Plate 5-8 (Lower Hiawatha seam). These maps show the boundaries of all areas proposed to be affected over the estimated total life of the coal mining and reclamation operations, including the size, sequence, and timing of mining of subareas to be affected beyond the present permit term. No surface disturbances are currently anticipated within the permit area beyond that presented in this M&RP.

Plates 5-7 and 5-8 also shows the location and extent of underground workings in which planned-subsidence mining methods will be used as well as areas where measures will be taken to prevent, control, or minimize subsidence and subsidence-related damage. The location of the waste-rock disposal area in relation to the underground mine workings, is discussed in Volume 3 of this M&RP.

Only development (room & pillar) mining is planned in the BLM ROW (UTU-91108) and expansion of SITLA Lease ML49443-OBA (Portions of Section 7, T21SR5 E; Portion of Sections 32 & 33, T20S R5E) in 2015 to facilitate maximum extraction of the coal in the immediate adjacent leased areas.

Land Surface Configuration. Slope measurements for undisturbed areas adjacent to disturbed areas associated with the mine are shown on Plate 5-2A&B. Surface facilities at the site have been in existence since 1941. Pre-mining topographic maps do not exist. Therefore, the slope measurements shown on Plate 5-2A&B are considered generally indicative of original land slopes in the vicinity of the mine.

Coal is transported from the continuous miner to the belt feeder by electric or diesel haulage units. Coal is conveyed out of the panel and on out of the mine by belt conveyors. Diesel-powered, rubber-tired tractors and service cars are used to transport personnel and materials from the portals to the working faces.

Pillars in developed entries will be left to protect adjacent panels.

Longwall Mining. Longwall mining is used for extraction of large, uniform blocks of coal where the panels are more than 2,500 feet in length and where a suitable longwall panel can be laid out. Coal thicknesses of up to 14 feet are mined in the SUFCA Mine using longwall methods. In areas where coal is thicker than the height capacity of the mining equipment, the unmined coal will be left on the bottom of the bed unless economic or safety conditions warrant otherwise.

The longwall mining system at the SUFCA Mine consists of three basic integrated sub-systems: self advancing roof support, shearer, and conveyance. Shield-type roof supports are used. Shield supports are generally considered more suitable for mining conditions such as those encountered at the SUFCA Mine and are designed for expansion, contraction, advancement, and movement in varying thicknesses of coal.

The longwall shearer at the SUFCA Mine utilizes a double-ended shearer system for efficiency and flexibility of operation. Such a system consists of two rotary cutting drums mounted on ranging arms which are pivoted to a common body containing the power and drive assemblies. An optimum-tip drive speed is associated with each drum-pick configuration and diameter to assure minimization of fines in the sheared coal. The conveyance system used in the mine has been designed to convey extracted coal along the 540 to 1000 foot faces.

Anticipated Production. Anticipated annual production of coal from the SUFCA Mine during the permit term is as follows:

2011 - 6.40 million tons
2012 - 6.49 million tons

- 2013 - 6.00 million tons
- 2014 - 5.99 million tons
- 2015 - 6.5 million tons
- 2016 - 2020 coal production will range from 5.8 thru 6.5 million tons

Through the remaining life of the mine, coal production from the mine is anticipated to be 4.85 million to 8.0 million tons per year.

Major Equipment. Major equipment in use at the SUFACO Mine is listed in Table 5-1. The same type of equipment or equivalent is expected to be used in the future.

5.2.4 Blasting and Explosives

Mining and reclamation activities at the SUFACO Mine generally does not require the use of blasting or explosives on the surface. Historically the infrequent surface blasting conducted at the SUFACO Mine has been for construction projects and for removal of dislodged boulders that roll into the surface facility area. These blasts have been under the 5 pound exemption in most cases, and have been conducted under the direction of a certified blaster. Any future blasting associated with mining and reclamation activities that may be needed will be conducted in accordance with R645-301-524. All underground blasting activities at the mine are conducted under the direction of a MSHA certified blaster.

5.2.5 Subsidence

SUFACO began operations which caused surface subsidence in June 1976. At that time, continuous miners were used to extract coal from pillars which were developed as part of a retreating panel. The panels were approximately 650 feet wide and varied in length up to 2,500 feet. The average mining height in this initial area of pillar extraction approached 11 feet and the extraction ratio averaged about 80 percent.

The resulting subsidence from the initial retreat mining averaged about 4 feet in plateau areas where the overburden was approximately 900 feet thick. In areas where panel boundaries were

- 7-9 Link Canyon Watershed

LIST OF APPENDICES (Continued)

(Appendices appear in Volumes 7, 8 and 9)

- 7-14 Sedimentation Pond Calculations
- 7-15 Alternative Sediment Control Measures Calculations and Designs
- 7-16 Small Area Exemption Demonstration Calculations
- 7-17 Investigation of Surface and Groundwater Systems in the Vicinity of the SUFCO Mine, Sevier County, Utah: Probable Hydrologic Consequences of Coal Mining at the SUFCO Mine and Recommendations for Surface and Groundwater Monitoring
- 7-18 Investigation of Surface and Groundwater Systems in the Pines Tract Area, Sevier County, Utah: Probable Hydrologic Consequences of Coal Mining in the Pines Tract and Recommendations for Surface and Groundwater Monitoring
- 7-19 Probable Hydrologic Consequences of Longwall Mining of the 3 Left Panel Modification Area at the SUFCO Mine
- 7-20 Investigation of Surface and Groundwater Systems in the SITLA Muddy Tract Area, Sevier County, Utah: Probable Hydrologic Consequences of Coal Mining in the SITLA Muddy Tract and Recommendations for Surface and Groundwater Monitoring
- 7-21 Muddy Tract Hydrologic Baseline Data (Includes SITLA Tract baseline data)
- 7-22 Investigation Plan for Springs Pines 105, Joes Mill Pond, Pines 310, and 311
- 7-23 Overflow Pond Calculations

Major surface drainages in the permit and adjacent areas are depicted in Figure 7-4. As indicated, the lease area exists entirely within the Muddy Creek watershed. Most of the lease area drains southward into Quitchupah Creek via the North Fork of Quitchupah Creek and various ephemeral tributaries. Quitchupah Creek flows southeastward into Ivie Creek which in turn flows eastward into Muddy Creek. The northeast portion of the lease area, including the majority of the Pines Tract, drains into Muddy Creek via Box Canyon.

Based on flow data obtained during the collection of water-quality samples, the following streams are considered perennial within the lease area:

- North Fork of Quitchupah Creek (as measured at stations SUFCA-007 and SUFCA-042)
- South Fork of the North Fork of Quitchupah Creek (as measured at station SUFCA-006)
- Quitchupah Creek (as measured at stations SUFCA-041 and SUFCA-046)
- Box Canyon, including East Fork Box Canyon (as measured at stations SUFCA-090, Pines 403, Pines 407 and Pines 408)
- Muddy Creek (as measured at stations Pines 405 and Pines 406)
- Cowboy Creek (as measured at station M-STR4)

According to Thiros and Cordy (1991), Link Canyon contains an ephemeral stream. Two small areas of riparian vegetation are supported in the canyon by discharge from springs near the head of the canyon (Link Canyon Spring GW-21, Plate 7-3) and the abandoned Link Canyon Mine workings (Link Portal West and Link Portal East, Plate 7-3). Water from Spring GW-21 near the head of Link Canyon typically flows only about 300 to 750 feet below the source, depending upon the season. Water discharged from the Link Canyon portals typically flows on the surface for 500

- Contamination of surface water from coal spillage due to hauling operations.

These potential impacts are addressed in the following sections of this M&RP.

7.2.8.2 Baseline Hydrologic and Geologic Information

Baseline geologic information is presented in Chapter 6 of this M&RP. Baseline hydrologic information is presented in Sections 7.2.4.1 and 7.2.4.2 of this M&RP. The baseline monitoring sources are believed to be representative of existing ground water and surface water. An additional inventory is not planned unless circumstances dictate a need for change.

7.2.8.3 PHC Determination

Potential Impacts to the Hydrologic Balance. Potential impacts to the hydrologic balance are addressed in the following subsections of this M&RP and in Appendices 7-17, 7-18, 7-19, 7-20 and 7-24. Appendices 7-18, 7-20 and 7-24 contain PHC determinations for mining activities in the Pines Tract, SITLA Muddy Tracts and West Coal Lease Modifications, respectively.

Acid- or Toxic- Forming Materials. Information on acid- and toxic-forming materials is presented in Chapter 6. These data reveal boron, sodium absorption ratio, and specific conductance exceedances of the Table 2 guidelines for management of topsoil and overburden (Leatherwood and Duce, 1988) in waste rock from the SUFCA mine. As noted in Section 7.2.4.2 of this M&RP, the alkalinity of the mine discharge water typically exceeds the acidity of this water by a factor of 20. Additionally, mine discharge water typically meets the standards for water quality for the state of Utah (Utah Water Quality Board, 1987). Thus, analytical data obtained from mine-water discharges indicate that although potential exists in localized portions of the mine for acid- or toxic-forming materials to be present, there has been no known impact to the surface or groundwater in the permit and adjacent areas.

Sediment Yield. The potential impact of mining and reclamation on sediment yield is an increase in sediment in the surface waters downstream from disturbed areas. Sediment-control measures
