All,

Just had a phone call from Wyatt Shakespeare at the SUFCO mine. Subsidence has occurred over top of the most recent panel mined. He is supposed to get the panel name to me, as he didn't have it readily available during our conversation. The surface owner is USFS. They plan on conducting repairs this week in conjunction with the USFS depending on the weather. The contact person that asked that they notify us is Rob Hamilton, USFS. That is as much information as I have right now. If you have more in depth questions please feel to call Wyatt at (435) 286-4490.

Thanks,
Karl
