Subject: Division Record for Task 4898, for Task 3780, Canyon Fuel Company, LLC, Sufco Mine, C/041/0002, Task 4898

Dear Mr May:

This memorandum is in reference to the above mentioned amendment and does not necessitate an update to the Technical Analysis. Task 3780, approved in 2011, failed to supply documentation of a Division inspection to the relevant sites that were removed from the bond. There are seven sheets that were affected in Task 3780: Belt Deicer tank, Covered Storage, Pulley racks, Shelves, Upper Water Tank, Lower Water tank, and Substation upper. These areas are still located within the disturbance area, but the buildings and foundations have since been removed. The earthwork associated with reseeded the area remains within the Earthwork sheet.

To meet the R645-301-830.410 and-880.200 rules to protect the State of Utah's surety in disturbed areas, Division staff conducted a site visit on July 9, 2014 to verify demolition of the facilities. The attached pictures included photo documentation that indeed the above stated facilities at the site have been demolished and can be removed from the bond calculations for the Sufco Mine.

If you have any questions, please feel free to call me at (801) 538-5286.

Sincerely,

Digitally signed by Cheryl Parker, P.E. M.S.
