We continue to be unable to access South Fork. We are hopeful that once the rain/snow finishes this week that we will have a few weeks of dry weather. Attempts were made on March 7, 9, 14th, 15th, 23rd and 24th. Snow drifts and saturated ground continue to be the deterrents. Approximately $\frac{3}{4}$ " of snow fell last week at the mine site, there was rain over the weekend. If you need additional information or have questions, please respond to this e-mail or call me at (435) 286-4481. Thanks, Vicky
