Hi Bryant,

I'll extend the due dates for the WRS As-Built Information (Task #5994) and the South Fork Clean Copies (Task #5995) until December 6th on one condition. The condition is that we have got to get the waste rock site amendment completed. This amendment has been going back and forth since June and now this information/deficiency has the potential to bleed into the Sufco midterm. I want to avoid the scenario where we have multiple amendments asking for the same information. We've been down that road before and it's unnecessarily complicated for all involved. I know you've had conversations with Priscilla and Justin regarding Task #5994, so I'm assuming that everyone's on the same page at this point. If not, please follow up with them accordingly so we can get this one wrapped up.

Please let me know if you have questions or want to discuss this.

Regards,
Steve

p.s. Have a great Thanksgiving!
