Good morning Bryant,

As a follow up to our phone conversation earlier, I'm writing to notify Sufco that at this time, the Additional Pines East Panel Amendment won't be formally reviewed at this time. The primary reason for that is that the amendment is missing the requisite cultural and biological reports and as such, can't possibly be approved at this time.

In recent years, the Division has initiated technical reviews of amendments absent the required rights of entry information in instances of large lease additions (e.g. Greens Hollow, Flat Canyon). The reason being that the leasing process can take an inordinate amount of time and so the Division has been willing to help identify technical issues absent a lease in order to save time. The addition of the additional panel in the Pines East Tract is obviously not on the scale of a large lease addition.

However; as time allows, feel free to contact the review staff and discuss the amendment with them.

Regards,
Steve
