Inspection Memo  
to Coal File:

RE: Utah Coal and Energy Company  
Blackhawk Mine  
ACT/043/001  
Summit County, Utah

The above mentioned mine was inspected on September 27, 1982 by John Whitehead and Barton Kale of the Division. The inspection were unaccompanied by mine personnel.

There was some evidence of ponding in front of the lower portal (this has caused problems in the past), the access to the upper portal shows signs of erosion, and the sediment pond, although showing no signs of failure is obviously not being maintained.

There were no signs of activity or development at the minesite and the entrance gate was locked.
