Inspection Memo to
Coal File

RE: Black Hawk Mine
Black Hawk Coal Company
INA/043/001, Folder No. 7
Summit County, Utah

Joe Helfrich and Sandy Pruitt inspected the Black Hawk Coal Mine on August 26, 1983. There was no evidence of any new activity. The west portal is entirely caved, sloughage of the gravel in front of the eastern portal has cleared an access to the mine which should be secured. The flooding of Chalk Creek this spring washed out the southern end of the access bridge. No other flood damage was apparent, the sediment pond is still intact.
