RE: Nomenclature For Summit County Coal Operations

Some confusion evidently exists with regard to nomenclature for two juxtaposed Summit County Coal operations. To help reduce this confusion we should standardize our reference to these operations as follows:

Summit Minerals #1 (Blackhawk Mine) INA/043/001

This mine has had Jack Higgins, Utah Coal, Summit Minerals, Summit Energy and Bennett Leasing all involved in permitting and compliance recently. My present understanding is that Summit Minerals is the applicant. Should the applicant or permittee change, the Company reference should be changed in the "Re" portions of the memo. Should we wish to discuss the other affiliated companies in a memo we should still reference the memo to Summit Minerals #1.

Summit Coal Company, Boyer Mine, PRO/043/008 & CEP/043/002

This is the Boyer Mine being operated by Summit Coal; it is distinct from the Blackhawk mine, and lists Richard Blonquist as the contact.

If we can standardize our nomenclature we should be able to facilitate filing and other requests for these two operations.
