RE: Soap Contract Boyer Mine ACT/083/008 Summit County, Utah

Grant Number G5138491 (SOAP operational) was funded for \$60,000 for the period of 7/1/83 to 6/30/84. In 1985 modification of this grant resulted in a contract with Earthfax Engineering, Inc. being initiated for FY 1985/1986 for a contracted expenditure based on a bid of \$36,960.00. Field work is progressing towards successful completion of the 1-year data collecting contract. Division guidelines state two years of hydrologic base line data should be on hand in order to satisfy permitting requirements. I recommend that the contract with Earthfax be extended to permit a second year of data acquisition.

With "mobilization and demobilization" costs built into the 1985/1986 grant, I feel with some modification, the \$23,000 balance of G 5138491 will suffice to provide the second year of base line data.

Should additional information be required, please advise.
