Re: Hydrology Section for Permit Application (dated January 21, 1987), Boyer Mine, Summit Coal Company PRO/043/008, Folder No. 2, Summit County, Utah

In Reply Please Refer To Case No. J260

Dear Mr. Braxton:

The Utah Preservation Office has received for consideration the above mentioned Boyer Mine Hydrology Section as an addendum to the Boyer Mine project. After review, our office has the following comments. In the section for Specifications for Construction of Groundwater Monitoring Well, the "discovery clause" stipulation should be mentioned. This states that if cultural resources are encountered during construction activities, work should stop immediately and an archaeologist should be contacted to make a professional evaluation.

The information covered in the above provided document contains no change that would affect any known cultural resources. Therefore, we concur that this project will have no effect on cultural resources.

The above is provided on request for assistance as outlined by 36 CFR 800 or Utah Code, Title 63-18-37. If you have questions or need additional assistance, please contact Lorraine Dobra at (801) 533-7039.

Sincerely,

Max J. Evans
Director and
State Historic Preservation Officer
