Re: Results of Overburden And Hydrologic Investigations of the Boyer Mine, Summit Coal Company, ACT/043/008, Summit County, Utah

Please find enclosed two volumes comprising the report entitled "Results of Overburden And Hydrologic Investigations of the Boyer Mine, Summit County, Utah" prepared by Earthfax Engineering, Inc. under contract with the Division of Oil, Gas and Mining. This investigation was funded through a grant provided by the Office of Surface Mining under the Small Operator's Assistance Program (SOAP). This final report presents results of a two year study of the hydrologic regime and overburden conditions at the Boyer Mine located in the Chalk Creek drainage basin in northeastern Utah.

The report is to be considered a portion of the approved permit to conduct mining operations issued to Summit Coal Company in May of 1987 (permit number ACT/043/008).

If you have any questions concerning this investigation, please direct them to Rick Summers, Reclamation Hydrologist.

Sincerely,

A handwritten signature in cursive script, appearing to read "Rick P. Summers".

Rick P. Summers
Reclamation Hydrologist
