PERMIT NUMBER: INA/043/008

DATE OF INSPECTION: 11/09/90

(Comments are Numbered to Correspond with Topics Listed Above)

1. Permits:

The permit for the Boyer mine was revoked on October 13, 1988 with the Division still proceeding with bond forfeiture proceedings.

4. Hydrologic Balance: Diversions and Sediment Control:

Two large berms were installed on the access roads as part of the portal closure contract work. The berms direct runoff from the upper pad and access roads to the sedimentation pond. Recent snowmelt demonstrated that the berms are functioning well. The west access road is essentially closed with the berm placement. The east access road berm contains an access crossing for maintenance equipment.

12. Backfilling and Grading:

On September 12, 1990 an onsite meeting for contractor bidding for the closure of the portals was held with Division employees and interested contractors. On October 2, 1990, the selected contractor proceeded onsite with the portal closure. Dave Darby, Division employee, acted as project inspector and was on the site during the entire closure process. The portal closure and related drainage control installation was completed on October 5, 1990. See memo to file by David Darby, October 16, 1990, for final construction report.
