Salt Lake City, Utah 84180-1203

Attn: Daron R. Haddock, Permit Supervisor

Gentlemen:

Per our discussion, it will be necessary for us to request an extension of time for further exploration of the Boyer Mine, CEP/043/008-91A, Folder #3, Summit County, Utah.

Since our first exploration which consisted merely of opening the portals on July 5th, 1991, we have been attempting to arrange a second trip with proper ventilation and permission from MSHA. Finally this has been accomplished.

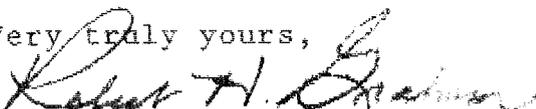

Our FAX to MSHA dated July 16, 1991 resulted in a list from them of 19 requirements before permission could be granted. After several communications with them, we are today attaching their approval letter.

One of the miners after his first visit here had a serious health problem in his family and did not feel he could make the trip to the mine until conditions improved. He is now planning to come to Utah on the week end of August 16th and 17th.

Therefore, it is our request that an extension of time be given for this exploration trip mid month and for time for an evaluation of the exploration. If conditions in the mine make it impossible for entry, we may have other conditions to overcome. We should like to have the miners satisfied that they have the information to make their decision.

Kindly therefore extend the time to the end of August, 1991 for completion.

Very truly yours,

Robert H. Graham, President

Re-entry Plan

Dear Mr. Graham:

The enclosed plan dated August 5, 1991, consisting of two pages and a mine map concerning the re-entry into the abandoned Boyer Mine, is hereby approved in accordance with 30 CFR 75.316.

Prior to the re-entry date, a seven day notification must be given to the Price Subdistrict Manager, Tony Gabossi, at 801/637-3051, so that an MSHA inspector may be present.

A copy of this approval should be made available to the miners and reviewed with all miners affected by this plan.

Sincerely,

A handwritten signature in cursive script that reads "William A. Holgate".

William A. Holgate
District Manager
