RE: Procurement of construction for Boyer Mine Project
AMR/043/909/P, INA/043/008

Enclosed is a set of construction specifications for the Boyer Project. It is RX number 560 2000000003. The estimated cost of the work is \$120,000. I would like for the job to be advertised on Monday, October 3, with bids due Tuesday, October 18 at 2:00 p.m. I would like to administer the contract as a purchase order.

The project consists of reclamation of an inactive coal mine in Summit County. The proposed work includes demolition and disposal of debris, site grading, earthwork, riprapped ditch construction, and revegetation. There is substantial earthwork, including an estimated 25,000 cubic yards of grading and placement of 475 cubic yards of rock riprap.

Please proceed with the advertising and procurement of this construction. Call me if you have any questions about the work. Thank you for your assistance. Also, thanks for letting us slip this in at the last minute.
